*Subject index

A

Abnormalities in IgA-containing mononuclear cells in gastric lesion of pernicious anemia, *46* (Abst.)

Acid, deoxyribonucleic, antibodies to, irradiated with ultraviolet light; detection by precipitins and immunofluorescence, *39* (Abst.)

Acid-base disorders, arterial blood gas and, in infants and children with status asthmaticus, *10* (Abst.)

Address, presidential (Dworetzky), 315 (American Academy of Allergy 25th Anniversary Series)

Adjuvant, Freund's, human lung and, autoimmune glomerulonephritis induced in sheep by injections, *40* (Abst.)

Adrenal, hypothalamic-pituitary-, function and response of plasma growth hormone and insulin to stimulation; intermittent steroid therapy, its effect on, *19* (Abst.)

responsiveness of asthmatic children after long-term alternate-day prednisone, 171 (Abst.)

Adrenergic, beta-, blockade and prostaglandin $F_{2\alpha}$, effect on isoproterenol and theophylline bronchodilation, 176 (Abst.)

blocking agents, histamine-sensitizing activity, analysis of structural requirements for, 171 (Abst.)

blockade, beta-, (B-A-B), to enhanced incorporation of glucose into muscle glycogen, relation of histamine sensitization by, 172 (Abst.)

Aerometric sampling and climatological factors, further observations on; New Orleans asthma, 164 (Abst.)

Airway, nasal, in children, objective assessment; evaluation of decongestant therapy, *31* (Abst.)

obstruction, site and nature, in chronic obstructive lung disease, *12* (Abst.)

Alcoholic beverages, significance of histamine content, 160 (Abst.)

Algae, green, immunologic responses of experimental animals to (Berstein et al.), 191

Allergen(s) antibodies, diagnosis of allergy by in vitro test for, *5* (Abst.)

Allergen(s)—Cont'd

fractionation by Sephadex G-200 gel filtration; mold allergy (Bonilla-Soto), 125

rye pollen, Group I, conversion to allergoid by mild Formalin treatment, 179 (Abst.)

Allergenicity and immunochemical characterization, evaluation; field trial of Dutch specimen of mite (*D. pteronyssinus*) in Western U.S.A., 158 (Abst.)

Allergic bronchopulmonary aspergillosis, clinical and immunologic features, 164 (Abst.)

contact dermatitis on palms, *42* (Abst.)

disease in anhidrotic congenital ectodermal dysplasia, increased prevalence, 161 (Abst.)

drug eruption, severe complication in; acute eosinophilic interstitial myocarditis, *20* (Abst.)

grass-, children, in vitro antigen-induced histamine release in, quantitative study on, 165 (Abst.)

human serum, normal and, binding of histamine by (Guirgis), 255

patients, antibody-forming plaques in blood after immunotherapy, 161 (Abst.)

rhinitis, asthma and, crossover double-blind study on *Tylophora indica* in treatment (Shivpuri et al.), 145; 178 (Abst.)

priming effect in: quantitative intranasal pollen challenges (Connell), 33

Allergoid, conversion of Group I rye pollen allergen to, by mild Formalin treatment, 179 (Abst.)

Allogeneic aortic-valve homografts, tolerance to, 173 (Abst.)

leukocyte cultures, lymphocyte-macrophage interaction in, 162 (Abst.)

Allografts, human renal, urine fibrinogen fragments in, *21* (Abst.)

renal, rejection; specific immunologic suppression, *5* (Abst.)

Allpyral, treatment of insect sting in children with, *3* (Abst.)

Alveolar macrophages, protection by glutathione and cysteine; cigarette smoke, *31* (Abst.)

*January, pp. 1-58; February, pp. 59-124; March, pp. 125-190; April, pp. 191-254; May, pp. 255-314; June, pp. 315-386.

Abstracts: January, pp. 1-8; February, pp. 9-16; March, pp. 17-24; April, pp. 25-32; May, pp. 33-40; June, pp. 41-48.

American Academy of Allergy:
Abstracts of papers given at Annual Meeting, 155
Historical review. I. Introduction, 119
25th Anniversary Series. Presidential address (Dworetzky), 315; Cell interaction in antibody synthesis (Talmage et al.), 323
Anaphylactoid purpura, uncommon complications, *28* (Abst.)
reactions associated with clinical use of dextran 70, *18* (Abst.)
Anaphylatoxic, chemotactic and, fragment cleaved from fifth component of guinea pig complement, *23* (Abst.)
Anaphylaxis (Bookman) (Booth and Patterson), 310 (Correspondence)
human, electrocardiographic abnormalities during, 159 (Abst.)
passive, in mice with G antibodies; release of histamine with heterologous G antibody preparations, *36* (Abst.)
in pertussis-vaccinated mouse, effect of nitrogen mustard on (Hargis and Malkiel), 9
(SRS-A), slow reacting substance, histamine and, release by γE system from sensitized monkey lung, 168 (Abst.)
third degree, from Hymenoptera stings, nonfatal results in, 159 (Abst.)
Anemia, pernicious, abnormalities in IgA-containing mononuclear cells in gastric lesion of, *46* (Abst.)
Angioedema, hereditary, pathologic alterations occurring in, 157 (Abst.)
Anhidrotic congenital ectodermal dysplasia, increased prevalence of allergic disease in, 161 (Abst.)
Anion exchange column, differential absorption of reagins isolated on, 183 (Abst.)
Announcements, 55, 122, 249, 312, 360
Antibiotic regimes in acute purulent exacerbations of chronic bronchitis, *13* (Abst.)
Antibiotics, macrolide, certain, glucocorticoid sparing effects, 156 (Abst.)
Antibody(ies), allergen, diagnosis of allergy by in vitro test for, *5* (Abst.)
anti-benzylpenicilloyl (BPO), in human sera, immunoglobulin classes, 168 (Abst.)
anti-γE, skin reactions to, in atopic, nonatopic, and immunologically deficient children and adults (Newcomb and Ishizaka), 292
antigen-, reactions in vitro, inhibition by nonsteroidal anti-inflammatory agents, *24* (Abst.)
antinuclear, in infectious mononucleosis, *22* (Abst.)
changes during desensitization of penicillin-sensitive patient, 168 (Abst.)
to deoxyribonucleic acid irradiated with ultraviolet light; detection by precipitins and immunofluorescence, *39* (Abst.)
Antibody(ies)—Cont'd
-forming plaques in blood of allergic patients of immunotherapy, 161 (Abst.)
G, preparations, heterologous, release of histamine with; passive anaphylaxis in mice with G antibodies, *36* (Abst.)
humoral, in sera of patients with bullous skin diseases, *46* (Abst.)
intestinal, to wheat fractions in celiac disease, *48* (Abst.)
levels, blocking, hay fever symptoms, and leukocyte histamine release in patients receiving very high dosage immunotherapy with ragweed pollen extract, 180 (Abst.)
penicillin, in children, *10* (Abst.)
-producing cells in division, *28* (Abst.)
rabbit reaginic, association with immunoglobulin distinct from IgG, IgA, and IgM (Strannegård and Chan), 224
reaginic, human, rhesus, and canine, comparative studies, 183 (Abst.)
and blocking, induction of both with low molecular weight fraction of timothy pollen extract (Malley and Perlman), 59
immunofluorescent localization in monkey skin passively sensitized with human ragweed atopic serum, 186 (Abst.)
response, serum, to immunization, effect of corticosteroids on, 170 (Abst.)
of secretions from ragweed-allergic patients, 184 (Abst.)
synthesis, cell interaction in (Talmage et al.), 323 (American Academy of Allergy 25th Anniversary Series)
specific, in patients with immunoglobulin deficits, 187 (Abst.)
titer, skin-sensitizing, changes in, after injections of aqueous pollen extract (Connell and Sherman), 22
Antigen(s)-antibody reactions in vitro, inhibition by nonsteroidal anti-inflammatory agents, *24* (Abst.)
challenge, histamine, 48-80, and, immediate skin response to, comparison of several indicators in visualization: hypersensitivity responses in monkeys (Feinberg et al.), 65
E content, and potency, of commercially prepared ragweed extracts, 181 (Abst.)
for evaluation of immune competence in man, hapten-protein conjugates as, reactive haptens versus conjugate (Kantor and Bullock), 349
fetal, result of increasing maternal exposure to: maternal sensitization after pregnancy in mice, *47* (Abst.)
fractionated, intradermal skin tests with; studies on immunodiagnosis of Paragonimiasis, *30* (Abst.)

Antigen(s)—Cont'd
-induced, in vitro, histamine release in grass-allergic children, quantitative study on, 165 (Abst.)
new, generated by pepsin hydrolysis of bovine milk protein, 174 (Abst.)
priming with, deletion of antigen-sensitive cells from bone marrow following, 185 (Abst.)
protein, in mice, delayed hypersensitivity to, investigation of mechanisms by which "enhancing" antiserum prevents induction (Crowle and Hu), 209
ragweed, in vitro response of human lymphocytes challenged by, *34* (Abst.)
-sensitive cells, deletion from bone marrow following priming with antigens, 185 (Abst.)
Anti-inflammatory nonsteroidal agents, inhibition of antigen-antibody reactions in vitro by, *24* (Abst.)
Antilymphocyte globulin, heterologous, *35* (Abst.)
Antinuclear antibodies in infectious mononucleosis, *22* (Abst.)
Antiserum, "enhancing," investigation of mechanisms by which, prevents induction of delayed hypersensitivity to protein antigens in mice (Crowle and Hu), 209
to lymphocytes; interactions with chemical immunosuppressants, *20* (Abst.)
specificity of inhibition of development of immediate and delayed hypersensitivities in mice by, *22* (Abst.)
Antitoxins, diphtheria, human γA and γG, relationship in serum and nasal fluids, 186 (Abst.)
Antitrypsin, alpha-1, deficiency, hereditary, obstructive lung disease in, 163 (Abst.)
Aortic-valve homografts, allogeneic, tolerance to, 173 (Abst.)
Aqueous pollen extract, changes in skin-sensitizing antibody titer after injections (Connell and Sherman), 22
Arterial blood gas and acid-base disorders on infants and children with status asthmaticus, *10* (Abst.)
Aspergillosis, allergic bronchopulmonary, clinical and immunologic features, 164 (Abst.)
Aspirin hypersensitivity, immunologic studies, 170 (Abst.)
Asthma admissions and deaths at Children's Hospital of Pittsburgh from 1935 to 1968, review, 155 (Abst.)
and allergic rhinitis, crossover double-blind study on *Tylophora indica* in treatment (Shivpuri et al.), 145; 178 (Abst.)
and asthmatoid bronchitis, mold allergy as cause, *34* (Abst.)
bronchial challenge testing in, 175 (Abst.)
compliance in, *18* (Abst.)
steroid resistance in, *26* (Abst.)
bronchodilating effect of glucagon in, 177 (Abst.)
Asthma—Cont'd
chronic, study of cortisol metabolism in patients with, *2* (Abst.)
exacerbations, disodium cromoglycate, new compound for (Chen et al.), 89
New Orleans; further observations on climatological factors and aerometric sampling, 164 (Abst.)
severe chronic, effect of long-term controlled exercises on physical capability of children with, 178 (Abst.)
significance of early ventilation-perfusion defects in, 179 (Abst.)
Asthmatic, atopic, children, healthy and, effect of bradykinin on, *26* (Abst.)
child, migratory atelectasis in, following steroid withdrawal (Hughes and Reisman), 301 (Brief communication)
children, adrenal responsiveness after long-term alternate-day prednisone, 171 (Abst.)
comparison of subcutaneous isoproterenol and epinephrine in, 175 (Abst.)
normal and, in a controlled environment, effects of rapid change in humidity on pulmonary function studies in (Fontana et al.), 16
and normal subjects, effects of isoproterenol and methacholine on pulmonary blood volume in, 177 (Abst.)
patients, immunofluorescent and histologic studies of lung tissue from, 155 (Abst.)
and nonasthmatic, effects of chloral hydrate on respiration of (Aldrete and Itkin), 342
subjects, response of blood gas tensions and diffusing capacity to isoproterenol in, 176 (Abst.)
Asthmaticus, status, adverse effects of inhalation of excessive amounts of nebulized isoproterenol in (Van Metre), 101
arterial blood gas and acid-base disorders in infants and children with, *10* (Abst.)
Asthmatoid bronchitis, mold allergy as cause of asthma and, *34* (Abst.)
Atelectasis, migratory, in asthmatic child following steroid withdrawal (Hughes and Reisman), 301 (Brief communication)
Atopic (asthmatic) children, healthy and, effect of inhalations of bradykinin on, *26* (Abst.)
dogs, in vitro reactions between ragweed and leukocytes, 172 (Abst.)
nonatopic, and immunologically deficient children and adults, skin reactions to anti-γE antibody in (Newcomb and Ishizaka), 292
serum, human, ragweed, immunofluorescent localization of reaginic antibodies in monkey skin passively sensitized with, 186 (Abst.)
Atopy, classical, elevated levels of IgE in conditions other than, 183 (Abst.)

Atopy—Cont'd
spontaneous canine, effect of 6-mercaptopurine on, 172 (Abst.)
Autoantibody activity in gastric juice; secretory immunoglobulin A, *37* (Abst.)

B

Barrett, Alex K., 358 (Obit.)
Becke, William G., 313 (Obit.)
Behçet's disease, cyclophosamide therapy (Buckley and Gills), 273
Benzylpenicilloyl, anti-, (BPO) antibodies in human sera, immunoglobulin classes, 168 (Abst.)
Blatella germanica—Linnaeus, German cockroach, excitant of bronchospasm, 158 (Abst.)
Blockade, beta-adrenergic (B-A-B), to enhanced incorporation of glucose into muscle glycogen, relation of histamine sensitization by, 172 (Abst.)
and prostaglandin F_{2a}, effect on isoproterenol and theophylline bronchodilation, 176 (Abst.)
Blocking activity, serum, clinical severity, leukocyte sensitivity and, in ragweed-sensitive persons, correlations between, 166 (Abst.)
agents, beta adrenergic, histamine-sensitizing activity, analysis of structural requirements for, 171 (Abst.)
antibodies, reaginic and, induction of both with low molecular weight fraction of timothy pollen extract (Malley and Perlman), 59
Blood of allergic patients, antibody-forming plaques in, after immunotherapy, 161 (Abst.)
cellular elements of rabbits infected with *Schistosoma mansoni*, in vitro histamine release from, *43* (Abst.)
gas, arterial, and acid-base disorders in infants and children with status asthmaticus, *10* (Abst.)
tensions and diffusing capacity to isoproterenol in asthmatic subjects, response, 176 (Abst.)
volume and hematocrit, effects of hypergammaglobulinemia on, 186 (Abst.)
pulmonary, in asthmatic and normal subjects, effects of isoproterenol and methacholine on, 177 (Abst.)
Bone marrow, deletion of antigen-sensitive cells from, following priming with antigens, 185 (Abst.)
Bovine milk protein, pepsin hydrolysis, new antigens generated by, 174 (Abst.)
Bradykinin, effect of inhalations on healthy and atopic (asthmatic) children, *26* (Abst.)
Bronchial asthma, compliance in, *18* (Abst.)
steroid resistance in, *26* (Abst.)
challenge testing in asthma, 175 (Abst.)
secretions, inflammation in, new objective criteria for, *4* (Abst.)
Bronchitis, asthmatoid, mold allergy as cause of asthma and, *34* (Abst.)
chronic, acute purulent exacerbations, antibiotic regimes in, *13* (Abst.)
Bronchodilating effect of glucagon in asthma, 177 (Abst.)
Bronchodilation, isoproterenol and theophylline, effect of beta-adrenergic blockade and prostaglandin F_{2a}, 176 (Abst.)
Bronchopulmonary aspergillosis, allergic, clinical and immunologic features, 164 (Abst.)
Bronchospasm, cycloergometer-induced (Pierson et al.), 136
German cockroach (*Blatella germanica*—Linnaeus), excitant of, 158 (Abst.)
Bullous diseases, studies in; immunofluorescent serologic tests, *27* (Abst.)
skin diseases, humoral antibodies in sera of patients with, *46* (Abst.)

C

Cadaver donor transplants, selection of recipients for: serotyping for homotransplantation, *45* (Abst.)
Celiac disease, intestinal antibodies to wheat fractions in, *48* (Abst.)
Cell(s), antibody-producing, in division, *28* (Abst.)
antigen-sensitive, deletion from bone marrow following priming with antigens, 185 (Abst.)
goblet, eosinophils and, in nasal smear, epidemiologic relationship of clinical nasal allergy to (Murray and Anderson), 1
IgA-containing mononuclear, in gastric lesion of pernicious anemia, abnormalities in, *46* (Abst.)
immunologically competent, in treatment of malignant disease, *21* (Abst.)
interaction in antibody synthesis (Talmage et al.), 323 (American Academy of Allergy 25th Anniversary Series)
living thymus, requirement for: thymus-marrow immunocompetence, *47* (Abst.)
Cellular differentiation in immunological system, thymic control, *16* (Abst.)
elements, blood, of rabbits infected with *Schistosoma mansoni*, in vitro histamine release from, *43* (Abst.)
immune deficiency, late-onset hypogammaglobulinemia with, 188 (Abst.)
Cerebrospinal fluid in cultured lymphocytes from patients with multiple sclerosis, unsuccessful attempt to induce transformation by, *22* (Abst.)
Chemotactic and anaphylatoxic fragment cleaved from fifth component of guinea pig complement, *23* (Abst.)
Chloral hydrate, effects, on respiration of nonasthmatic and asthmatic patients (Aldrete and Itkin), 342

Chorioretinitis, autoimmune, in monkeys, *39* (Abst.)
Chromatography, differential absorption of reagins isolated on anion exchange column, 183 (Abst.)
Cigarette smoke; protection of alveolar macrophages by glutathione and cysteine, *31* (Abst.)
Climatological factors and aerometric sampling, further observations on; New Orleans asthma, 164 (Abst.)
Cockroach, German (*Blatella germanica*—Linnaeus), excitant of bronchospasm, 158 (Abst.)
Cold-agglutination syndrome, acute renal failure in, *19* (Abst.)
Collar, flea-, dermatitis, *42* (Abst.)
Complement, guinea pig, chemotactic and anaphylatoxic fragment cleaved from fifth component, *23* (Abst.)
  studies in systemic lupus erythematosus; in vivo metabolism of C'3 and C'4, 157 (Abst.)
  third component, and immunoglobulin G, distinct receptor sites for; human monocytes, *38* (Abst.)
Congenital ectodermal dysplasia, anhidrotic, increased prevalence of allergic disease in, 161 (Abst.)
Conjugates, hapten-protein, as antigens for evaluation of immune competence in man; reactive haptens versus conjugate (Kantor and Bullock), 349
Contact dermatitis, allergic, on palms, *42* (Abst.)
  sensitizer in man, immunologic unresponsiveness to, *35* (Abst.)
Cornea, human, distribution of immunoglobulins in, 190 (Abst.)
Correspondence, 151, 309
Corticosteroids, effect on serum antibody response to immunization, 170 (Abst.)
Cortisol, local effects, in time course of eosinophilotaxis with use of improved technique (Felarca and Lowell), 114
  metabolism in patients with chronic asthma, study, *2* (Abst.)
Cromoglycate, disodium, clinical trial, 156 (Abst.)
    new compound for prevention of exacerbations of asthma (Chen et al.), 89
Cryoglobulinemia, mixed IgG-IgM; report of case presenting as hemorrhagic urticaria and responsive to cyclophosamide therapy, 189 (Abst.)
Cultures, allogeneic leukocyte, lymphocyte-macrophage interaction in, 162 (Abst.)
Cycloergometer-induced bronchospasm (Pierson et al.), 136
Cyclophosamide therapy of Behçet's disease (Buckley and Gills), 273
Cyclophosamide therapy—Cont'd
    report of case presenting as hemorrhagic urticaria and responsive to; mixed IgG-IgM cryoglobulinemia, 189 (Abst.)
  of severe uveal inflammation, 190 (Abst.)
Cysteine, glutathione and, protection of alveolar macrophages by; cigarette smoke, *31* (Abst.)

D

Dale, Sir Henry, 56 (Obit.)
Decongestant, oral, influence on eustachian tube function in children, 160 (Abst.)
  therapy, evaluation; objective assessment of nasal airway in children, *31* (Abst.)
Deoxyribonucleic acid, antibodies to, irradiated with ultraviolet light; detection by precipitins and immunofluorescence, *39* (Abst.)
Dermatitis, allergic contact, on palms, *42* (Abst.)
  flea-collar, *42* (Abst.)
Dermatophagoides pteronyssinus, Dutch specimen of mite, in Western U.S.A., field trial; evaluation of allergenicity and immunochemical characterization, 158 (Abst.)
Dermographism, fine morphology of human skin in, 173 (Abst.)
Desensitization of penicillin-sensitive patient, antibody changes during, 168 (Abst.)
Dexamethasone, intranasal, versus oral dexamethasone and intranasal Synalar and its acetate, comparison of treatment of ragweed hay fever with, 179 (Abst.)
Dextran 70, anaphylactoid reactions associated with clinical use, *18* (Abst.)
Diffusing capacity and blood gas tensions to isoproterenol in asthmatic subjects, response, 176 (Abst.)
Diphtheria antitoxins, human γA and γG, relationship in serum and nasal fluids, 186 (Abst.)
Disease(s), Bechet's, cyclophosamide therapy (Buckley and Gills), 273
  bullous skin, humoral antibodies in sera of patients with, *46* (Abst.)
    studies in; immunofluorescent serologic tests, *27* (Abst.)
  celiac, intestinal antibodies to wheat fractions in, *48* (Abst.)
  chronic obstructive lung, drive and performance of ventilatory apparatus in, *13* (Abst.)
    site and nature of airway obstruction in, *12* (Abst.)
  fatal granulomatous, *31* (Abst.)
  heavy-chain, *14* (Abst.)
  obstructive lung, in hereditary alpha-1 antitrypsin deficiency, 163 (Abst.)
Disodium cromoglycate, clinical trial, 156 (Abst.)

Disodium cromoglycate—Cont'd
new compound for prevention of exacerbations of asthma (Chen et al.), 89
Donor transplants, cadaver, selection of recipients for: serotyping for homotransplantation, *45* (Abst.)
Drug(s) eruption, allergic, severe complication in; acute eosinophilic interstitial myocarditis, *20* (Abst.)
or insect-sensitive individuals, skin window test in, 174 (Abst.)
other, various tranquilizers and, influence on immediate skin reactions: hypersensitivity responses in monkeys (Feinberg et al.), 81
reactions, *11* (Abst.)
Dust, house, immunochemical evaluation of therapy with injections, 165 (Abst.)
treatment, *27* (Abst.)
wood, hypersensitivity to, 159 (Abst.)
Dysgammaglobulinemia in tropical sprue, *32* (Abst.)
type one, and cyclic neutropenia, effect of immunoglobulin on IgM levels and PMN count in patient with, 189 (Abst.)
Dysplasia, anhidrotic congenital ectodermal, increased prevalence of allergic disease in, 161 (Abst.)
thymic, five years survival in child with, 188 (Abst.)

E

Ectodermal dysplasia, anhidrotic congenital, increased prevalence of allergic disease in, 161 (Abst.)
Ehrlich, Edmund E., 313 (Obit.)
Electrocardiographic abnormalities during human anaphylaxis, 159 (Abst.)
Environment, controlled, effects of rapid change in humidity on pulmonary function studies in normal and asthmatic children in (Fontana et al.), 16
Eosinophilic interstitial myocarditis, acute; severe complication in allergic drug eruption, *20* (Abst.)
leukemia; immunopathological reaction, *32* (Abst.)
Eosinophilotaxis, time course, local effects of cortisol in, with use of improved technique (Felarca and Lowell), 114
Eosinophils, and goblet cells in nasal smear, epidemiologic relationship of clinical nasal allergy to (Murray and Anderson), 1
Epidemiologic relationship of clinical nasal allergy to eosinophils and to goblet cells in nasal smear (Murray and Anderson), 1
Epinephrine and isoproterenol, subcutaneous, comparison in asthmatic children, 175 (Abst.)
Erythematosus, systemic lupus, complement studies in; in vivo metabolism of C'3 and C'4, 157 (Abst.)
Erythematosus, systemic lupus—Cont'd
immunoglobulins G, A, and M in, *29* (Abst.)
Eustachian tube function in children, influence of oral decongestant on, 160 (Abst.)
Exacerbations, acute purulent, of chronic bronchitis, antibiotic regimes in, *13* (Abst.)
of asthma, disodium cromoglycate, new compound for (Chen et al.), 89
Exercises, long-term controlled, effect on physical capability of children with severe chronic asthma, 178 (Abst.)
Extract, aqueous pollen, changes in skin-sensitizing antibody titer after injections (Connell and Sherman), 22
timothy pollen, low molecular weight fraction, induction of both reaginic and blocking antibodies with (Malley and Perlman), 59

F

Fetal antigens, result of increasing maternal exposure to; maternal sensitization after pregnancy in mice, *47* (Abst.)
Fever, steroid-induced, mechanism, *40* (Abst.)
Fibrinogen fragments, urine, in human renal allografts, *21* (Abst.)
Filtration, gel, Sephadex G-200, fractionation of allergens by; mold allergy (Bonilla-Soto), 125
Flea-collar dermatitis, *42* (Abst.)
Fluid(s), cerebrospinal, in cultured lymphocytes from patients with multiple sclerosis, unsuccessful attempt to induce transformation by, *22* (Abst.)
serum and nasal, relationship of human γA and γG diphtheria antitoxins in, 186 (Abst.)
Formalin treatment, mild, conversion of Group I rye pollen allergen to "allergoid" by, 179 (Abst.)
Freund's adjuvant, human lung and, autoimmune glomerulonephritis induced in sheep by injections, *40* (Abst.)

G

Gamma globulin, intravenous: metabolism of gamma globulin fragments, *1* (Abst.)
Gas, arterial blood, and acid-base disorders in infants and children with status asthmaticus, *10* (Abst.)
tensions, blood, and diffusing capacity to isoproterenol in asthmatic subjects, response, 176 (Abst.)
Gastric juice, autoantibody activity in; secretory immunoglobulin A, *37* (Abst.)
lesion of pernicious anemia, abnormalities in IgA-containing mononuclear cells in, *46* (Abst.)

Gastrointestinal milk sensitivity, milk-precipitating substance in stool in, *1* (Abst.)
Gel filtration, Sephadex G-200, fractionation of allergens by; mold allergy (Bonilla-Soto), 125
Gillson, Reginald E., 359 (Obit.)
Globulin, antilymphocyte, heterologous, *35* (Abst.)
gamma, human, adverse reactions following administration (Ellis and Henney), 45
intravenous: metabolism of gamma globulin fragments, *7* (Abst.)
levels, immune, in sudden death syndrome, *13* (Abst.)
serum gamma-G, levels in normal, premature, post-mature, and "small-for-dates" newborn babies, *29* (Abst.)
Glomerulonephritis, autoimmune, induced in sheep by injections of human lung and Freund's adjuvant, *40* (Abst.)
Glucagon, bronchodilating effect in asthma, 177 (Abst.)
Glucocorticoid sparing effects of certain macrolide antibiotics, 156 (Abst.)
Glucose, enhanced incorporation into muscle glycogen, relation of histamine sensitization by beta-adrenergic blockade (B-A-B) to, 172 (Abst.)
Glutathione and cysteine, protection of alveolar macrophages by; cigarette smoke, *31* (Abst.)
Glycogen, muscle, enhanced incorporation of glucose into, relation of histamine sensitization by beta-adrenergic blockade (B-A-B) to, 172 (Abst.)
Glycolosis, inhibition, in relation to chemical suppression of proliferative response of lymphocytes stimulated in vitro, 163 (Abst.)
Goblet cells, eosinophils and, in nasal smear, epidemiologic relationship of clinical nasal allergy to (Murray and Anderson), 1
Gorham, L. Whittington, 123 (Obit.)
Granulomatous disease, fatal, *31* (Abst.)
Grass-allergic children, in vitro antigen-induced histamine release in, quantitative study on, 165 (Abst.)
pollenosis, treatment with various preparations; thirteen year study, *26* (Abst.)
Growth hormone, plasma, and insulin to stimulation, response, effect of intermittent steroid therapy on hypothalamic-pituitary-adrenal function and, *19* (Abst.)

H

Hapten-protein conjugates as antigens for evaluation of immune competence in man; reactive haptens versus conjugate (Kantor and Bullock), 349
Haptens, simple chemical, immuologic specificity of localized Shwartzman phenomenon in guinea pigs by, *14* (Abst.)
Hay fever, ragweed, comparison of treatment with intranasal dexamethasone versus oral dexamethasone and intranasal Synalar and its acetate, 179 (Abst.)
immunologic and clinical studies of single year of immunotherapy for, 180 (Abst.)
laboratory assessment of efficacy of immunotherapy for, 166 (Abst.)
symptoms, blocking antibody levels, and leukocyte histamine release in patients receiving very high dosage immunotherapy with ragweed pollen extract, 180 (Abst.)
Heavy-chain disease, *14* (Abst.)
Hematocrit, blood volume and, effects of hypergammaglobulinemia on, 186 (Abst.)
Hemorrhagic urticaria, report of case presenting as, and responsive to cyclophosamide therapy; mixed IgG-IgM cryoglobulinemia, 189 (Abst.)
Hereditary alpha-1 antitrypsin deficiency, obstructive lung disease in, 163 (Abst.)
angioedema, pathologic alterations occurring in, 157 (Abst.)
Histamine binding by normal and allergic human serum (Guirgis), 255
content of alcoholic beverages, significance, 160 (Abst.)
48-80, and antigen challenge, comparison of several indicators in visualization of immediate skin response to: hypersensitivity responses in monkeys (Feinberg et al.), 65
with G antibody preparations, release; passive anaphylaxis in mice with G antibodies, *36* (Abst.)
in human tissues, physiological levels, *28* (Abst.)
release, in vitro antigen-induced, in grass-allergic children, quantitative study on, 165 (Abst.)
from blood cellular elements of rabbits infected with *Schistosoma mansoni*, *43* (Abst.)
leukocyte, hay fever symptoms, blocking antibody levels and, in patients receiving very high dosage immunotherapy with ragweed pollen extract, 180 (Abst.)
from sensitized rabbit leukocytes and associated platelet involvement, 167 (Abst.)
sensitization by beta-adrenergic blockade (B-A-B), relation to enhanced incorporation of glucose into muscle glycogen, 172 (Abst.)
-sensitizing activity of beta adrenergic blocking agents, analysis of structural requirements for, 171 (Abst.)

Histamine—Cont'd
and slow reacting substance of anaphylaxis (SRS-A), release by γE system from sensitized monkey lung, 168 (Abst.)
Histologic and immunofluorescent studies of lung tissue from asthmatic patients, 155 (Abst.)
Historical review; introduction: American Academy of Allergy, 119
Homograft(s), allogeneic aortic-valve, tolerance to, 173 (Abst.)
reaction, alpha-2-hyperglobulinemia as humoral indicator, *37* (Abst.)
Homotransplantation, serotyping for; analysis of kidney transplants from unrelated donors, *38* (Abst.)
selection of recipients for cadaver donor transplants, *45* (Abst.)
Hormone, plasma growth, and insulin to stimulation, response, effect of intermittent steroid therapy on hypothalamic-pituitary-adrenal function and, *19* (Abst.)
House dust allergy, mites and, *2* (Abst.)
mites, cultivation (Spieksma) (Miyamoto et al.), 151 (Correspondence)
Humidity, effects of rapid change in, on pulmonary function studies in normal and asthmatic children in controlled environment (Fontana et al.), 16
Humoral antibodies in sera of patients with bullous skin diseases, *46* (Abst.)
Hydrate, chloral, effects of, on respiration of nonasthmatic and asthmatic patients (Aldrete and Itkin), 342
Hydrolysis, pepsin, of bovine milk protein, new antigens generated by, 174 (Abst.)
Hymenoptera stings, nonfatal results in third degree anaphylaxis from, 159 (Abst.)
Hypergammaglobulinemia, alpha-2-, as humoral indicator of homograft reaction, *37* (Abst.)
effects on blood volume and hematocrit, 186 (Abst.)
Hypersensitivity(ies), aspirin, immunologic studies on, 170 (Abst.)
delayed, clinical evaluation of alteration in, sarcoidosis, *16* (Abst.)
in vivo and in vitro effects of measles virus in, 162 (Abst.)
to Merthiolate preservative (Reisman), 245 (Brief communication)
to protein antigens in mice, investigation of mechanisms by which "enhancing" antiserum prevents induction (Crowle and Hu), 209
immediate and delayed, in mice, specificity of inhibition by antiserum of development, *22* (Abst.)
penicillin, in nurses, 169 (Abst.)
Hypersensitivity(ies)—Cont'd
responses in monkeys: comparison of several indicators in visualization of immediate skin response to histamine, 48-80, and antigen challenge (Feinberg et al.), 65
in monkeys: influence of various tranquilizers and other drugs on immediate skin reactions (Feinberg et al.), 81
specific immunologic suppression of delayed type, *6* (Abst.)
to wood dust, 159 (Abst.)
Hypogammaglobulinemia, late-onset, with cellular immune deficiency, 188 (Abst.)
Hypothalamic-pituitary-adrenal function and response of plasma growth hormone and insulin to stimulation; intermittent steroid therapy, its effect on, *19* (Abst.)

I

IgA, IgG, and IgM, immunoglobulin distinct from, association of rabbit reaginic antibody with (Strannegård and Chan), 224
-containing mononuclear cells in gastric lesion of pernicious anemia, abnormalities in, *46* (Abst.)
IgE, elevated levels in conditions other than classical atopy, 183 (Abst.)
IgG, IgA, and IgM, immunoglobulin distinct from, association of rabbit reaginic antibody with (Strannegård and Chan), 224
-IgM cryoglobulinemia, mixed; report of case presenting as hemorrhagic urticaria and responsive to cyclophosamide therapy, 189 (Abst.)
IgM-IgG cryoglobulinemia, mixed; report of case presenting as hemorrhagic urticaria and responsive to cyclophosamide therapy, 189 (Abst.)
IgG, and IgA, immunoglobulin distinct from, association of rabbit reaginic antibody with (Strannegård and Chan), 224
levels and PMN count, effect of immunoglobulin on, in patient with type one dysgammaglobulinemia and cyclic neutropenia, 189 (Abst.)
Ileum and lung of monkey, passive sensitization of skin and lung of human being and, comparison with sera of ragweed-sensitive patients (McGerity et al.), 200
Immune competence in man, hapten-protein conjugates as antigens for evaluation of; reactive haptens versus conjugate (Kantor and Bullock), 349
deficiency, cellular, late-onset hypogammaglobulinemia with, 188 (Abst.)
globulin levels in sudden death syndrome, 13 (Abst.)
Immunization, effect of corticosteroids on serum antibody response to, 170 (Abst.)

Immunization—Cont'd
with live and inactivated polio vaccine and natural infection, immunoglobulin response in secretions and serum after, *44* (Abst.)
Immunochemical characterization and allergenicity, evaluation; field trial of Dutch specimen of mite *(D. pteronyssinus)* in Western U.S.A., 158 (Abst.)
evaluation of therapy with injections of house dust, 164 (Abst.)
Immunocompetence, thymus-marrow; requirement for living thymus cells, *47* (Abst.)
Immunodiagnosis of Paragonimiasis, studies on; intradermal skin tests with fractionated antigens, *30* (Abst.)
Immunofluorescence, precipitins and, detection by; antibodies to deoxyribonucleic acid irradiated with ultraviolet light, *39* (Abst.)
Immunofluorescent and histologic studies of lung tissue from asthmatic patients, 155 (Abst.)
localization of reaginic antil odies in monkey skin passively sensitized with human ragweed atopic serum, 186 (Abst.)
serologic test; studies in bullous diseases, *27* (Abst.)
Immunoglobulin(s) A, secretory; autoantibody activity in gastric juice, *37* (Abst.)
class E, inhibition of Prausnitz-Küstner reaction by proteolytic-cleavage fragments of human myeloma protein, *6* (Abst.)
classes of anti-benzylpenicilloyl (BPO) antibodies in human sera, 168 (Abst.)
deficits, specific antibody synthesis in patients with, 187 (Abst.)
distinct from IgG, IgA, and IgM, association of rabbit reaginic antibody with (Strannegård and Chan), 224
distribution in human cornea, 190 (Abst.)
effect on IgM levels and PMN count in patient with type one dysgammaglobulinemia and cyclic neutropenia, 189 (Abst.)
G, A, and M in systemic lupus erythematosus, *29* (Abst.)
G, third component of complement and, distinct receptor sites for; human monocytes, *38* (Abst.)
guinea pig gamma-1 and gamma-2, biological activities, 185 (Abst.)
response in serum and secretions after immunization with live and inactivated polio vaccine and natural infection, *44* (Abst.)
serum: levels in children subject to recurrent infection, *15* (Abst.)
Immunologic(al) responses of animals to green algae (Bernstein et al.), 191
specificity of localized Shwartzman phenomenon in guinea pigs by simple chemical haptens, *14* (Abst.)
Immunologic(al)—Cont'd
studies on aspirin hypersensitivity, 170 (Abst.)
cold urticaria, 169 (Abst.)
of insulin allergy and resistance, 169 (Abst.)
suppression of delayed type: hypersensitivity, *6* (Abst.)
specific; rejection of renal allografts, *5* (Abst.)
system, thymic control of cellular differentiation in, *16* (Abst.)
tests, prediction of penicillin allergy by (Levine and Zolov), 231
role, in its diagnosis; penicillin allergy in children (Bierman and Van Arsdel), 267
tolerance, persistence, effect of phytohaemagglutinin on, *8* (Abst.)
Immunologically deficient children and adults, atopic, nonatopic and, skin reactions to anti-γE antibody in (Newcomb and Ishizaka), 292
"tolerant" guinea pigs, macrophage inhibitory factor (MIF) production in, 162 (Abst.)
Immunopathological reaction; eosinophilic leukemia, *32* (Abst.)
Immunosuppressant(s), chemical, interactions with; antiserum to lymphocytes, *20* (Abst.)
from group A streptococci, *46* (Abst.)
Immunosuppression in steriod resistant nephropathy, 187 (Abst.)
Immunotherapy, antibody-forming plaques in blood of allergic patients after, 161 (Abst.)
laboratory assessment of efficacy, for ragweed hay fever, 166 (Abst.)
for ragweed hay fever, immunologic and clinical studies of single year of, 180 (Abst.)
very high dosage, with ragweed pollen extract, hay fever symptoms, blocking antibody levels, and leukocyte histamine release in patients receiving, 180 (Abst.)
Inactivated and live polio vaccine and natural infection, immunoglobulin response in secretions and serum after immunization with, *44* (Abst.)
Infected with *Schistosoma mansoni*, in vitro histamine release from blood cellular elements of rabbits, *43* (Abst.)
Infection, natural, and inactivated and live polio vaccine, immunoglobulin response in secretions and serum after immunization with, *44* (Abst.)
recurrent, levels in children subject to: serum immunoglobulins, *15* (Abst.)
Infectious mononucleosis, antinuclear antibodies in, *22* (Abst.)
Inflammation in bronchial secretions, new objective criteria for, *4* (Abst.)
Influenza virus vaccines, mineral oil adjuvant, seventeen years' experience with, *15* (Abst.)

Inhalation(s), adverse effects, of excessive amounts of nebulized isoproterenol in status asthmaticus (Van Metre), 101
of bradykinin, effect on healthy and atopic (asthmatic) children, *26* (Abst.)
Inhibition, Mycoplasma, of phytohemagglutinin stimulation of lymphocytes, *45* (Abst.)
of Prausnitz-Küstner reaction by proteolytic-cleavage fragments of human myeloma protein of immunoglobulin class E, *6* (Abst.)
Insect- or drug-sensitive individuals, skin window test in, 174 (Abst.)
-sting allergy (Chafee), 309 (Correspondence)
treatment, in children, with Allpyral, *3* (Abst.)
Insulin allergy and resistance, immunologic studies, 169 (Abst.)
response of plasma growth hormone and, to stimulation, effect of intermittent steroid therapy on hypothalamic-pituitary-adrenal function and, *19* (Abst.)
Interstitial myocarditis, acute eosinophilic; severe complication in allergic drug eruption, *20* (Abst.)
Intestinal antibodies to wheat fractions in celiac disease, *48* (Abst.)
Intradermal tests in nonatopic children, *11* (Abst.)
Intranasal pollen challenges, quantitative: priming effect in allergic rhinitis (Connell), 33
Isoproterenol in asthmatic subjects, response of blood gas tensions and diffusing capacity to, 176 (Abst.)
and epinephrine, subcutaneous, comparison in asthmatic children, 175 (Abst.)
methacholine, effects on pulmonary blood volume in asthmatic and normal subjects, 177 (Abst.)
theophylline bronchodilation, effect of beta-adrenergic blockade and prostaglandin $F_{2\alpha}$ on, 176 (Abst.)
nebulized, in status asthmaticus, adverse effects of inhalation (Van Metre), 101

K

Kidney transplants from unrelated donors, analysis; serotyping for homotransplantation, *38* (Abst.)
Kikuth, Walter, 252 (Obit.)

L

Lesion, gastric, of pernicious anemia, abnormalities in IgA-containing mononuclear cells in, *46* (Abst.)
Leukemia, eosinophilic; immunopathologic reaction, *32* (Abst.)
Leukocyte(s) cultures, allogeneic, lymphocyte-macrophage interaction in, 162 (Abst.)
Leukocyte(s)—Cont'd
histamine release, hay fever symptoms, blocking antibody levels and, in patients receiving very high dosage immunotherapy with ragweed pollen extract, 180 (Abst.)
ragweed and, of atopic dogs, in vitro reactions between, 172 (Abst.)
sensitivity, clinical severity, and serum blocking activity in ragweed-sensitive persons, correlations between, 166 (Abst.)
sensitized rabbit, and associated platelet involvement, histamine release from, 167 (Abst.)
Light, ultraviolet, antibodies to deoxyribonucleic acid irradiated with; detection by precipitins and immunofluorescence, *39* (Abst.)
Live and inactivated polio vaccine and natural infection, immunoglobulin response in secretions and serum after immunization with, *44* (Abst.)
Lung disease, chronic obstructive, drive and performance of ventilatory apparatus in, *13* (Abst.)
site and nature of airway obstruction in, *12* (Abst.)
obstructive, in hereditary alpha-1 antitrypsin deficiency, 163 (Abst.)
of human being, skin and, and ileum and lung of monkey, passive sensitization, comparison with sera of ragweed-sensitive patients (McGerity et al.), 200
human, and Freund's adjuvant, autoimmune glomerulonephritis induced in sheep by injections, *40* (Abst.)
sensitized monkey, release of histamine and slow reacting substance of anaphylaxis (SRS-A) from, by γE system, 168 (Abst.)
tissue from asthmatic patients, immunofluorescent and histologic studies, 155 (Abst.)
Lupus erythematosus, systemic, complement studies in; in vivo metabolism of C'3 and C'4, 157 (Abst.)
immunoglobulins G, A, and M in, *29* (Abst.)
Lymphocyte(s), antiserum to, interactions with chemical immunosuppressants, *20* (Abst.)
cultured, from patients with multiple sclerosis, unsuccessful attempt to induce transformation by cerebrospinal fluid in, *22* (Abst.)
human, challenged by ragweed antigen, in vitro response, *34* (Abst.)
-macrophage interaction in allogeneic leukocyte cultures, 162 (Abst.)
Mycoplasma inhibition of phytohemagglutinin stimulation of, *45* (Abst.)
stimulated in vitro, inhibition of glycolysis in relation to chemical suppression of proliferative response, 163 (Abst.)

M

Macrolide antibiotics, certain, glucocorticoid sparing effects, 156 (Abst.)
Macrophage(s), alveolar, protection by glutathione and cysteine; cigarette smoke, *31* (Abst.)
inhibitory factor (MIF) production in immunologically "tolerant" guinea pigs, 162 (Abst.)
-lymphocyte interaction in allogeneic leukocyte cultures, 162 (Abst.)
Malignant disease, immunologically competent cells in treatment, *21* (Abst.)
Mansoni, Schistosoma, in vitro histamine release from blood cellular elements of rabbits infected with, *43* (Abst.)
Marrow, bone, deletion of antigen-sensitive cells from, following priming with antigens, 185 (Abst.)
thymus-, immunocompetence; requirement for living thymus cells, *47* (Abst.)
Mastocytosis, nasal, 182 (Abst.)
Maternal sensitization after pregnancy in mice: result of increasing maternal exposure to fetal antigens, *47* (Abst.)
Maxwell, Leslie A. I., 251 (Obit.)
Measles virus in delayed hypersensitivity, in vivo and in vitro effects, 162 (Abst.)
Medrysone, new ophthalmic steroid, clinical efficacy, *23* (Abst.)
6-Mercaptopurine, effect on spontaneous canine atopy, 172 (Abst.)
Merthiolate preservative, delayed hypersensitivity to (Reisman), 245 (Brief communication)
Metabolism, cortisol, in patients with chronic asthma, study, *2* (Abst.)
of gamma globulin fragments: intravenous gamma globulin, *1* (Abst.)
in vivo, of C'3 and C'4; complement studies in systemic lupus erythematosus, 157 (Abst.)
Methacholine and isoproterenol, effects on pulmonary blood volume in asthmatic and normal subjects, 177 (Abst.)
Milk-precipitating substance in stool in gastrointestinal milk sensitivity, *7* (Abst.)
protein, bovine, pepsin hydrolysis, new antigens generated by, 174 (Abst.)
Mineral oil adjuvant influenza virus vaccines, seventeen years' experience with, *15* (Abst.)
Mite(s) *(D. pteronyssinus)*, Dutch specimen in Western U.S.A., field trial; evaluation of allergenicity and immunochemical characterization, 158 (Abst.)
house dust allergy and, *2* (Abst.)
cultivation (Spieksma) (Miyamoto et al.), 151 (Correspondence)
Mold allergy as cause of asthma and asthmatoid bronchitis, *34* (Abst.)
Mold allergy—Cont'd
fractionation of allergens by Sephadex G-200 gel filtration (Bonilla-Soto), 125
Molecular weight fraction, low, of timothy poilen extract, induction of both reaginic and blocking antibodies with (Malley and Perlman), 59
Monocytes, human, distinct receptor sites for third component of complement and for immunoglobulin G, *38* (Abst.)
Mononuclear cells, IgA-containing, in gastric lesion of pernicious anemia, abnormalities in, *46* (Abst.)
Mononucleosis, infectious, antinuclear antibodies in, *22* (Abst.)
Mucus flow, tracheal, adverse effect of oxygen on, *36* (Abst.)
Multiple sclerosis, unsuccessful attempt to induce transformation by cerebrospinal fluid in cultured lymphocytes from patients with, *22* (Abst.)
Muscle glycogen, enhanced incorporation of glucose into, relation of histamine sensitization by beta-adrenergic blockade (B-A-B) to, 172 (Abst.)
Mustard, nitrogen, effect, on anaphylaxis in pertussis-vaccinated mouse (Hargis and Malkiel), 9
Mycoplasma inhibition of phytohemagglutinin stimulation of lymphocytes, *45* (Abst.)
Myeloma protein, human, of immunoglobulin class E, inhibition of Prausnitz-Küstner reaction by proteolytic-cleavage fragments, *6* (Abst.)
Myocarditis, acute eosinophilic interstitial; severe complication in allergic drug eruption, *20* (Abst.)

N

Nasal airway in children, objective assessment; evaluation of decongestant therapy, *31* (Abst.)
allergy, clinical, epidemiologic relationship, to eosinophils and to goblet cells in nasal smear (Murray and Anderson), 1
fluids, serum and, relationships of human γA and γG diphtheria antitoxins in, 186 (Abst.)
mastocytosis, 182 (Abst.)
Nebulized isoproterenol in status asthmaticus, adverse effects of inhalation (Van Metre), 101
Nephropathy, steroid resistant, immunosuppression in, 187 (Abst.)
Neutropenia, cyclic, type one dysgammaglobulinemia and effect of immunoglobulin on IgM levels and PMN count in patient with, 189 (Abst.)
New Orleans asthma; further observations on climatological factors and aerometric sampling, 164 (Abst.)
Nitrofurantoin pulmonary reaction, chronic: report of five cases, *43* (Abst.)

Nitrogen mustard, effect, on anaphylaxis in pertussis-vaccinated mouse (Hargis and Malkiel), 9
Nonasthmatic and asthmatic patients, effects of chloral hydrate on respiration of (Aldrete and Itkin), 342
Nonatopic children, intradermal tests in, *11* (Abst.)
Nonsmokers' and smokers' children, health of (Cameron et al.), 336
Nonsteroidal anti-inflammatory agents, inhibition of antigen-antibody reactions in vitro by, *24* (Abst.)

Stout, Benjamin M., Jr., 314
Thomas, David R., Jr., 253
Wiseman, Joseph R., 253
Zall, Morton, 254
Obstruction, airway, site and nature, in chronic obstructive lung disease, *12* (Abst.)
Obstructive lung disease, chronic, drive and performance of ventilatory apparatus in, *13* (Abst.)
site and nature of airway obstruction in, *12* (Abst.)
in hereditary alpha-1-antitrypsin deficiency, 163 (Abst.)
Ophthalmic steroid, new, medrysone, clinical efficacy, *23* (Abst.)
Oscillations, superimposed forced, respiratory flow resistance in children determined by, 175 (Abst.)
Oxygen, adverse effect on tracheal mucus flow, *36* (Abst.)

P

Palms, allergic contact dermatitis on, *42* (Abst.)
Paragonimiasis, studies on immunodiagnosis; intradermal skin tests with fractionated antigens, *30* (Abst.)
Parsons, John W., 57 (Obit.)
Passive anaphylaxis in mice with G antibodies; release of histamine with G antibody preparations, *36* (Abst.)
sensitization of skin and lung of human being and ileum and lung of monkey, comparison with sera of ragweed-sensitive patients (McGerity et al.), 200
transfer of methocholine sensitivity, 167 (Abst.)
PCA, reagin-induced, in monkeys, inhibition by intravenous injection of heterologous serum, 184 (Abst.)
Penicillin allergy, prediction by immunological tests (Levine and Zolov), 231
in children; role of immunologic tests in its diagnosis (Bierman and Van Arsdel), 267
antibodies in children, *10* (Abst.)
hypersensitivity in nurses, 169 (Abst.)
influence on platelet serotonin uptake and release in penicillin allergy, *4* (Abst.)
-sensitive patient, antibody changes during desensitization, 168 (Abst.)
Pepsin hydrolysis of bovine milk protein, new antigens generated by, 174 (Abst.)
Pernicious anemia, abnormalities in IgA-containing mononuclear cells in gastric lesion of, 46 (Abst.)
Pertussis-vaccinated mouse, effect of nitrogen mustard on anaphylaxis in (Hargis and Malkiel), 9
Photoallergy, soap, *42* (Abst.)
Phytohaemagglutinin, effect on persistence of immunological tolerance, *8* (Abst.)
stimulation of lymphocytes, Mycoplasma inhibition of, *45* (Abst.)
Pituitary-adrenal, hypothalamic-, function, and the response of plasma growth hormone and insulin to stimulation; intermittent steroid therapy, its effect on, *19* (Abst.)
Plaques, antibody-forming, in blood of allergic patients after immunotherapy, 161 (Abst.)
Plasma growth hormone and insulin to stimulation, response, effect of intermittent steroid therapy on hypothalamic-pituitary-adrenal function and, *19* (Abst.)
Platelet involvement, associated, sensitized rabbit leukocytes and, histamine release from, 167 (Abst.)
serotonin uptake and release in penicillin allergy, influence of penicillin on, *4* (Abst.)
Polio vaccine and natural infection, inactivated and live, immunoglobulin response in secretions and serum after immunization with, *44* (Abst.)
Pollen challenges, quantitative, intranasal: priming effect in allergic rhinitis (Connell), 33
extract, aqueous, changes in skin-sensitizing antibody titer after injections (Connell and Sherman), 22
ragweed, very high dosage immunotherapy with, hay fever symptoms, blocking antibody levels, and leukocyte histamine release in patients receiving, 180 (Abst.)
timothy, low molecular weight fraction, induction of both reaginic and blocking antibodies with (Malley and Perlman), 59
rye, allergen, Group I, conversion to "allergoid" by mild Formalin treatment, 179 (Abst.)

Pollinosis, experimental ragweed, induced during normal respiration in test chamber; initial observations, 181 (Abst.)
grass, treatment with various preparations; thirteen year study, *26* (Abst.)
Polymorphonuclear cell (PMN) count, IgM levels and, effect of immunoglobulin on, in patient with type one dysgammaglobulinemia and cyclic neutropenia, 189 (Abst.)
PPD, tuberculin skin testing with, in humans, specificity of immediate reaction in, *30* (Abst.)
Prausnitz-Küstner reaction, inhibition by proteolytic-cleavage fragments of human myeloma protein of immunoglobulin class E, *6* (Abst.)
Precipitins and immunofluorescence, detection by; antibodies to deoxyribonucleic acid irradiated with ultraviolet light, *39* (Abst.)
Prednisone, long-term alternate-day, adrenal responsiveness of asthmatic children after, 171 (Abst.)
Pregnancy in mice, maternal sensitization after: result of increasing maternal exposure to fetal antigens, *47* (Abst.)
Preservative, Merthiolate, delayed hypersensitivity to (Reisman), 245 (Brief communication)
Presidential address (Dworetzky), 315 (American Academy of Allergy 25th Anniversary Series)
Proliferative response of lymphocytes stimulated in vitro, inhibition of glycolysis in relation to chemical suppression, 163 (Abst.)
Prostaglandin F_{2_α} and beta-adrenergic blockade, effect on isoproterenol and theophylline bronchodilation, 176 (Abst.)
Protein antigens in mice, delayed hypersensitivity to, investigation of mechanisms by which "enhancing" antiserum prevents induction (Crowle and Hu), 209
bovine milk, pepsin hydrolysis, new antigens generated by, 174 (Abst.)
hapten-, conjugates as antigens for evaluation of immune competence in man; reactive haptens versus conjugate (Kantor and Bullock), 349
human myeloma, of immunoglobulin class E, inhibition of Prausnitz-Küstner reaction by proteolytic-cleavage fragments, *6* (Abst.)
Proteolytic-cleavage fragments of human myeloma protein of immunoglobulin class E, inhibition of Prausnitz-Küstner reaction by, *6* (Abst.)
Pulmonary blood volume in asthmatic and normal subjects, effects of isoproterenol and methacholine on, 177 (Abst.)
Pulmonary—Cont'd
function studies in normal and asthmatic children in controlled environment, effects of rapid change in humidity on (Fontana et al.), 16
reaction, chronic nitrofurantoin: report of five cases, *43* (Abst.)
Purpura, anaphylactoid, uncommon complications, *28* (Abst.)
Purulent exacerbations, acute, of chronic bronchitis, antibiotic regimes in, *13* (Abst.)

R

Ragweed-allergic patients, antibodies of secretions from, 184 (Abst.)
antigen, in vitro response of lymphocytes challenged by, *34* (Abst.)
atopic serum, human, immunofluorescent localization of reaginic antibodies in monkey skin passively sensitized with, 186 (Abst.)
extracts, commercially prepared, potency and antigen E content, 181 (Abst.)
hay fever, comparison of treatment with intranasal dexamethasone versus oral dexamethasone and intranasal Synalar and its acetate, 179 (Abst.)
immunologic and clinical studies of a single year of immunotherapy for, 180 (Abst.)
laboratory assessment of efficacy of immunotherapy for, 166 (Abst.)
and leukocytes of atopic dogs, in vitro reactions between, 172 (Abst.)
pollen extract, very high dosage immunotherapy with, hay fever symptoms, blocking antibody levels, and leukocyte histamine release in patients receiving, 180 (Abst.)
pollinosis, experimental, induced during normal respiration in test chamber; initial observations, 181 (Abst.)
-sensitive patients, comparison of passive sensitization of skin and lung of human being and ileum and lung of monkey with sera of (McGerity et al.), 200
persons, correlations between clinical severity, leukocyte sensitivity, and serum blocking activity in, 166 (Abst.)
Reaction(s), adverse, following administration of human gamma globulin (Ellis and Henney), 45
chronic nitrofurantoin pulmonary: report of five cases, *43* (Abst.)
drug, *11* (Abst.)
immediate skin, influence of various tranquilizers and other drugs on: hypersensitivity responses in monkeys (Feinberg et al.), 81
in tuberculin skin testing with PPD in humans, specificity, *30* (Abst.)
immunopathological; eosinophilic leukemia, *32* (Abst.)

Reaction(s)—Cont'd
Prausnitz-Küstner, inhibition by proteolytic-cleavage fragments of human myeloma protein of immunoglobulin class E, *6* (Abst.)
skin, to anti-γE antibody in atopic, nonatopic, and immunologically deficient children and adults (Newcomb and Ishizaka), 292
Reactive haptens versus conjugate: hapten-protein conjugates as antigens for evaluation of immune competence in man (Kantor and Bullock), 349
Reagin(s), differential absorption, isolated anion exchange column, 183 (Abst.)
-induced PCA in monkeys, inhibition by intravenous injection of heterologous serum, 184 (Abst.)
Reaginic antibody(ies), human, rhesus, and canine, comparative studies, 183 (Abst.)
immunofluorescent localization in monkey skin passively sensitized with human ragweed atopic serum, 186 (Abst.)
rabbit, association with immunoglobulin distinct from IgG, IgA, and IgM (Strannegård and Chan), 224
and blocking antibodies, induction of both with low molecular weight fraction of timothy pollen extract (Malley and Perlman), 59
Receptor sites, distinct, for third component of complement, immunoglobulin G; human monocytes, *38* (Abst.)
Renal allografts, human, urine fibrinogen fragments in, *21* (Abst.)
rejection; specific immunological suppression, *5* (Abst.)
failure, acute, in cold-agglutination syndrome, *19* (Abst.)
Respiration of nonasthmatic and asthmatic patients, effects of chloral hydrate on (Aldrete and Itkin), 342
normal, in test chamber, experimental ragweed pollinosis induced during; initial observations, 181 (Abst.)
Respiratory flow resistance in children determined by superimposed forced oscillations, 175 (Abst.)
Response(s), hypersensitivity, in monkeys: comparison of several indicators in visualization of immediate skin response to histamine, 48-80, and antigen challenge (Feinberg et al.), 65
influence of various tranquilizers and other drugs on immediate skin reactions (Feinberg et al.), 81
immunoglobulin, in serum and secretions after immunization with live and inactivated polio vaccine and natural infection, *44* (Abst.)
Rhinitis, allergic, asthma and, crossover double-blind study on *Tylophora indica* in treatment (Shivpuri et al.), 145; 178 (Abst.)
Rhinitis, allergic—Cont'd
priming effect in: quantitative intranasal pollen challenges (Connell), 33
Rye pollen allergen, Group 1, conversion to "allergoid" by mild Formalin treatment, 179 (Abst.)

S

Safran, Louis, 124 (Obit.)
Salén, Ernest B., 251 (Obit.)
Sarcoidosis, clinical evaluation of alteration in delayed hypersensitivity, *16* (Abst.)
Schistosoma mansoni, in vitro histamine release from blood cellular elements of rabbits infected with, *43* (Abst.)
Sclerosis, multiple, unsuccessful attempt to induce transformation by cerebrospinal fluid in cultured lymphocytes from patients with, *22* (Abst.)
Secretions, bronchial, inflammation in, new objective criteria for, *4* (Abst.)
and serum, immunoglobulin response in, after immunization with live and inactivated polio vaccine and natural infection, *44* (Abst.)
Secretory immunoglobulin A; autoantibody activity in gastric juice, *37* (Abst.)
Sensitive, antigen-, cells, deletion from bone marrow following priming with antigens, 185 (Abst.)
Sensitivity, leukocyte, clinical severity, and serum blocking activity in ragweed-sensitive persons, correlations between, 166 (Abst.)
methacholine, passive transfer, 167 (Abst.)
milk, gastrointestinal, milk-precipitating substance in stool in, 7 (Abst.)
Sensitization, histamine, by beta-adrenergic blockade (B-A-B), relation to enhanced incorporation of glucose into muscle glycogen, 172 (Abst.)
maternal, after pregnancy in mice: result of increasing maternal exposure to fetal antigens, *47* (Abst.)
passive, of skin and lung of human being and ileum and lung of monkey, comparison with sera of ragweed-sensitive patients (McGerity et al.), 200
Sensitizer, contact, in man, immunologic unresponsiveness to, *35* (Abst.)
Sensitizing, histamine-, activity of beta adrenergic blocking agents, analysis of structural requirements for, 171 (Abst.)
skin-, antibody titer, changes in, after injections of aqueous pollen extract (Connell and Sherman), 22
Sephadex G-200 gel filtration, fractionation of allergens by; mold allergy (Bonilla-Soto), 125
Serologic tests, immunofluorescent; studies in bullous diseases, *27* (Abst.)
Serotonin, platelet, uptake and release in penicillin allergy, influence of penicillin on, *4* (Abst.)

Serotyping for homotransplantation; analysis of kidney transplants from unrelated donors, *38* (Abst.)
selection of recipients for cadaver donor transplants, *45* (Abst.)
Serum (sera) antibody response to immunization, effect of corticosteroids on, 170 (Abst.)
blocking activity, clinical severity, leukocyte sensitivity and, in ragweed-sensitive persons, correlations between, 166 (Abst.)
gamma-G globulin levels in normal, premature, post-mature, and "small-for-dates" newborn babies, *29* (Abst.)
heterologous, inhibition of reagin-induced PCA in monkeys by intravenous injection, 184 (Abst.)
human, immunoglobulin classes of anti-benzylpenicilloyl (BPO) antibodies in, 168 (Abst.)
ragweed atopic, immunofluorescent localization of reaginic antibodies in monkey skin passively sensitized with, 186 (Abst.)
immunoglobulins: levels in children subject to recurrent infections, *15* (Abst.)
and nasal fluids, relationship of human γA and γG diphtheria antitoxins in, 186 (Abst.)
normal and allergic human, binding of histamine by (Guirgis), 255
of patients with bullous skin diseases, humoral antibodies in, *46* (Abst.)
of ragweed-sensitive patients, comparison of passive sensitization of skin and lung of human being and ileum and lung of monkey with (McGerity et al.), 200
and secretions, immunoglobulin response in, after immunization with live and inactivated polio vaccine and natural infection, *44* (Abst.)
Shwartzman phenomenon, localized, immunologic specificity, in guinea pigs by simple chemical haptens, *14* (Abst.)
Skin diseases, bullous, humoral antibodies in sera of patients with, *46* (Abst.)
human, fine morphology in dermographism, 173 (Abst.)
and lung of human being and ileum and lung of monkey, passive sensitization, comparison with sera of ragweed-sensitive patients (McGerity et al.), 200
monkey, passively sensitized with human ragweed atopic serum, immunofluorescent localization of reaginic antibodies in, 186 (Abst.)
reactions to anti-γE antibody in atopic, nonatopic, and immunologically deficient children and adults (Newcomb and Ishizaka), 292
immediate, influence of various tranquilizers and other drugs on: hypersensitivity responses in monkeys (Feinberg et al.), 81
Skin—Cont'd
response, immediate, to histamine, 48-80, and antigen challenge, comparison of several indicators in visualization: hypersensitivity responses in monkeys (Feinberg et al.), 65
-sensitizing antibody titer, changes in, after injection of aqueous pollen extract (Connell and Sherman), 22
testing, tuberculin, with PPD in humans, specificity of immediate reaction in, *30* (Abst.)
tests, intradermal, with fractionated antigens; studies on immunodiagnosis of Paragonimasis, *30* (Abst.)
window test in drug- or insect-sensitive individuals, 174 (Abst.)
Smear, nasal, epidemiologic relationship of clinical nasal allergy to eosinophils and to goblet cells in (Murray and Anderson), 1
Smoke, cigarette; protection of alveolar macrophages by glutathione and cysteine, *31* (Abst.)
Smokers' and nonsmokers' children, health (Cameron et al.), 336
Soap photoallergy, *42* (Abst.)
Sprue, tropical, dysgammaglobulinemia in, *32* (Abst.)
Sputum-liquifying agents, comparative in vitro evaluation, 182 (Abst.)
Status asthmaticus, adverse effects of inhalation of excessive amounts of nebulized isoproterenol in (Van Metre), 101
arterial blood gas and acid-base disorders in infants and children with, *10* (Abst.)
Steroid-induced fever, mechanism, *40* (Abst.)
new ophthalmic, medrysone, clinical efficacy, *23* (Abst.)
resistance in bronchial asthma, *26* (Abst.)
resistant nephropathy, immunosuppression in, 187 (Abst.)
therapy, intermittent; its effect on hypothalamic-pituitary-adrenal function and response of plasma growth hormone and insulin to stimulation, *19* (Abst.)
withdrawal, migratory atelectasis in asthmatic child following (Hughes and Reisman), 301 (Brief communication)
Stimulation, phytohemagglutinin, of lymphocytes, Mycoplasma inhibition of, *45* (Abst.)
Sting(s), Hymenoptera, nonfatal results in third degree anaphylaxis from, 159 (Abst.)
insect-, allergy (Chafee), 309 (Correspondence)
treatment, in children, with Allpyral, *3* (Abst.)
Stool, milk-precipitating substance in, in gastrointestinal milk sensitivity, *7* (Abst.)
Stout, Benjamin M., Jr., 314 (Obit.)

Streptococci, group A, immunosuppressant from, *46* (Abst.)
Suppression, specific immunologic, of delayed type: hypersensitivity, *6* (Abst.)
Synalar, intranasal, and its acetate and oral dexamethasone, comparison of treatment of ragweed hay fever with intranasal dexamethasone versus, 179 (Abst.)
Syndrome, sudden death, immune globulin levels in, *13* (Abst.)
Synthesis, antibody, cell interaction in (Talmage et al.), 323 (American Academy of Allergy 25th Anniversary Series)
Systemic lupus erythematosus, complement studies in; in vivo metabolism of C'3 and C'4, 157 (Abst.)
immunoglobulins G, A, M, *29* (Abst.)

T

Test(s), immunofluorescent serologic; studies in bullous diseases, *27* (Abst.)
immunological, prediction of penicillin allergy by (Levine and Zolov), 231
role, in its diagnosis; penicillin allergy in children (Bierman and Van Arsdel), 267
intradermal, in nonatopic children, *11* (Abst.)
skin, with fractionated antigens; studies on immunodiagnosis of Paragonimasis, *30* (Abst.)
skin window, in drug- or insect-sensitive individuals, 174 (Abst.)
Testing, tuberculin skin, with PPD in humans, specificity of immediate reaction in, *30* (Abst.)
Theophylline and isoproterenol bronchodilation, effect of beta-adrenergic blockade and prostaglandin F_{2a} on, 176 (Abst.)
Thomas, David R., Jr., 253 (Obit.)
Thymic control of cellular differentiation in immunological system, *16* (Abst.)
dysplasia, 5 years survival in child, 188 (Abst.)
Thymus-marrow immunocompetence; requirement for living thymus cells, *47* (Abst.)
Timothy pollen extract, low molecular weight fraction, induction of both reaginic and blocking antibodies with (Malley and Perlman), 59
Tissue(s), human, physiological levels of histamine in, *28* (Abst.)
lung, from asthmatic patients, immunofluorescent and histologic studies, 155 (Abst.)
Titer, skin-sensitizing antibody, changes in, after injection of aqueous pollen extract (Connell and Sherman), 22
Tracheal mucus flow, adverse effect of oxygen on, *36* (Abst.)
Tranquilizers, various, and other drugs, influence on immediate skin reactions; hypersensitivity responses in monkeys (Feinberg et al.), 81
Transfer, passive, of methacholine sensitivity, 167 (Abst.)
Transplants, cadaver donor, selection of recipients for: serotyping for homotransplantation, *45* (Abst.)
kidney, from unrelated donors, analysis; serotyping for homotransplantation, *38* (Abst.)
Tuberculin skin testing with PPD in humans, specificity of immediate reaction in, *30* (Abst.)
Tylophora indica in treatment of asthma and allergic rhinitis, crossover double-blind study on (Shivpuri et al.), 145; 178 (Abst.)

U

Ultraviolet light, antibodies to deoxyribonucleic acid irradiated with; detection by precipitins and immunofluorescence, *39* (Abst.)
Urine fibrinogen fragments in human renal allografts, *21* (Abst.)
Urticaria, cold; immunological studies, 170 (Abst.)
hemorrhagic, report of case presenting as, and responsive to cyclophosamide therapy; mixed IgG-IgM cryoglobulinemia, 189 (Abst.)
localized heat (Delorme), 284
Uveal inflammation, severe, cyclophosamide therapy, 190 (Abst.)

V

Vaccine, influenza virus, mineral oil adjuvant, 17 years' experience *15* (Abst.)
polio, and natural infection, inactivated and live, immunoglobulin response in secretions and serum after immunization with, *44* (Abst.)
Ventilation-perfusion defects, early, significance in asthma, 179 (Abst.)
Ventilatory apparatus, drive and performance in chronic obstructive lung disease, *13* (Abst.)
Virus, measles, in delayed hypersensitivity, in vivo and in vitro effects, 162 (Abst.)
vaccines, influenza, mineral oil adjuvant, seventeen years' experience with, *15* (Abst.)

W

Wiseman, Joseph R., 253 (Obit.)
Wheat fractions in celiac disease, intestinal antibodies to, *48* (Abst.)
Wiskott-Aldrich syndrome; immunopathologic mechanisms and long-term survival, *24* (Abst.)

Z

Zall, Morton, 254 (Obit.)

Subject index*

A

Acid, aminocaproic (EACA), extensive muscle necrosis after long-term treatment with, in case of hereditary periodic edema, *45* (Abst.)
  para-aminosalicylic, in human serum, demonstration of antibodies to, *3* (Abst.)
  uric, serum and urinary, in respiratory acidosis, *2* (Abst.)
Acidosis, respiratory, serum and urinary, uric acid in, *2* (Abst.)
Adrenal cortical insufficiency, immunologic aspects, *36* (Abst.)
  function, allergic rhinitis and, effect of intranasal betamethasone-17-valerate on (Brostoff and Czarny), 77
  pituitary-, suppression and Cushing's syndrome after intermittent dexamethasone therapy, *4* (Abst.)
Aeroallergen, appraisal of Rumex pollen as (Solomon), 25
Aerosol therapy, isoproterenol (Van Metre), 321 (Correspondence)
Air, inspired, humidification in, *16* (Abst.)
Alcohol administration, chronic, effect on immune responsiveness of rats (Tennenbaum et al.), 272
Alexander, H. L., 59 (Obit.)
Allergenic fungal spores of Delhi, India, metropolitan area, studies (Agarwal et al.), 193; (Shivpuri and Agarwal), 204
Allergen(s), contact, identification by animal assay, guinea pig maximazation test, *35* (Abst.)
  major (cod), characterization (Aas and Elsayed), 333
Allergic aspergillosis; review of 32 cases, *11* (Abst.)
  nasal itching, digit sucking and, association of incisor protrusion with (Murray and Anderson), 239
  reaction to penicillin present in milk, *32* (Abst.)
    to pyrvinium pamoate, *20* (Abst.)
    systemic, to ingested antigens (Golbert et al.), 96
  rhinitis and adrenal function, effect of intranasal betamethasone-17-valerate on (Brostoff and Czarny), 77
    bronchial asthma, and allergy skin tests among college students (Hagy and Settipane), 323
Alum-precipitated, pyridine-extracted ragweed, immunogenicity (Hogan et al.), 70
Alymphoplasia, thymic, combined immune deficiency disease, anti-LW antibody production in child with, *31* (Abst.)
American Academy of Allergy:
  Historian's Report, 248
  25th Anniversary Series. A rational approach to desensitization (Norman), 129; The spaceship earth (Dubos), 1
Aminocaproic acid (EACA), extensive muscle necrosis after long-term treatment with, in case of hereditary periodic edema, *45* (Abst.)
Anaphylactic transfusion reactions associated with anti-IgA antibody, *23* (Abst.)
Anaphylatoxin, generation; interactions of complement system with endotoxic lipopolysaccharide, *6* (Abst.)
Andersen sampler, estimation of airborne fungal flora by, versus gravity settling culture plate: isolation frequency and numbers of colonies (Sayer et al.), 214
Anemia, autoimmune hemolytic, in child with congenital X-linked hypogammaglobulinemia, *30* (Abst.)
  pernicious, intrinsic factor and parietal cell antibody in, blocking and binding antibodies to, *29* (Abst.)
Anergy, dysimmunoglobulinemia, and unexplained inflammation: new approach with chemically defined diet (Buckley), 355
Angioneurotic edema, hereditary, involving small intestines, *24* (Abst.)
Announcements, 123, 191, 260, 322, 369
Antibiotics and age, immune response of bursaless birds as influenced by, *4* (Abst.)
Antibody(ies), anti-LW production in child with combined immune deficiency disease (thymic alymphoplasia), *31* (Abst.)
  antiprotein, enumeration of cells synthesizing, by modified hemolytic assay, *13* (Abst.)
  blocking and binding, to intrinsic factor and parietal cell antibody in pernicious anemia, *29* (Abst.)
Epstein-Barr (E.B.), and infectious mononucleosis, *7* (Abst.)

*July, pp. 1-62; August, pp. 63-128; September, pp. 129-192; October, pp. 193-260; November, pp. 261-322; December, pp. 323-388.

Abstracts: July, pp. *1-8*; August, pp. *9-16*; September, pp. *17-24*; October, pp. *25-32*; November, pp. *33-40*; December, pp. *41-48*.

Antibody(ies)—Cont'd
to para-aminosalicylic acid in human serum, demonstration, *3* (Abst.)
rabbit reaginic, to protein and hapten-protein conjugates, formation, *46* (Abst.)
ragweed, induced in nonatopic dogs, characterization, *29* (Abst.)
reaginic (skin-sensitizing), effects of beta-propiolactone (Betaprone) on (Perlman and Malley), 10
responses in serum and nasal secretions of children immunized with inactivated and attenuated measles-virus vaccine, *46* (Abst.)
Antigen(s) E, immunotherapy with (Reisman et al.), 82
house dust, six species of dust mites and, cross-antigenicity among (Miyamoto et al.), 228
ingested, systemic allergic reactions to (Golbert et al.), 96
rye grass pollen, in vitro studies (Lichtenstein et al.), 307
sperm, inactivation by sera and tissues of female reproductive tract, *5* (Abst.)
Antigenic relation between house dust and dust mite *Dermatophagoides farinae* Hughes, 1961, by fractionation method (Miyamoto et al.), 282
Antihistamine drugs, new approach to use of histamine skin tests in study of, *32* (Abst.)
toxicity in children, *28* (Abst.)
Antilymphocyte globulin injection, development of reticulum-cell sarcoma at site of, in patient with renal transplant, *48* (Abst.)
serum, subconjunctival, corneal homograft reaction following, *51* (Abst.)
Antilymphocytic sera, action on reactions caused by immune-complex formations, *38* (Abst.)
Antisera, various, effect on surfaces of sensitized rat lymph-node cells, *23* (Abst.)
Aplasia, congenital, of thymus gland (DiGeorge's syndrome), *8* (Abst.)
Arsenic and cancer (Frost), 320 (Correspondence)
asthma, and cancer (Novey and Martel), 315 (Brief communication)
Artificial ventilation, prolonged, in severe status asthmaticus, *42* (Abst.)
Aspergillosis, allergic; review of 32 cases *11* (Abst.)
Asthma, arsenic, and cancer (Novey and Martel), 315 (Brief communication)
bronchial, allergic rhinitis, and allergy skin tests among college students (Hagy and Settipane), 323
controlled study of disodium cromoglycate in treatment (Lopez et al.), 118 (Brief communication)
effect of salbutamol on spirometry and blood-gas tensions in, *21* (Abst.)
bronchospasm of, heparin as treatment for, *34* (Abst.)
Asthma—Cont'd
deaths from, with special reference to last drug treatment, *35* (Abst.)
and emphysema, patients with, comparison of midplane, full-chest tomograms, diffusing capacities, sputum eosinophil content, and other parameters in (Preiser et al.), 154
infectious-related, phagocytosis of bacteria by eosinophils in (Cohen and Sapp), 113
due to inhalation of moth flies (Psychoda) (Phanichyakarn et al.), 51 (Brief communication)
spontaneous canine, effect of 6-mercaptopurine on (Arkins et al.), 108
Asthmatic children, metabolic, circulatory, and bronchomotor responses, to epinephrine infusion (Lecks et al.), 261
Asthmaticus, status, severe, prolonged artificial ventilation in, *42* (Abst.)
Atelectasis, migratory (Tuft) (Reisman and Hughes), 189 (Correspondence)
Atopic dermatitis, skin blood flow in, *26* (Abst.)
of patients with, catechol-o-methyl in, *19* (Abst.)
disease, infection and, ciliocytophthoria in nasal secretion and its relation to infection and atopic disease (Papaioanou et al.), 165
non-, characterization of ragweed antibodies induced in, *29* (Abst.)
and normal individuals, immunologic response to keyhole limpet hemocyanin (Salvaggio et al.), 344
Atrophy and striae, cutaneous, due to topical corticosteroids, *19* (Abst.)
Autoimmune hemolytic anemia in child with congenital X-linked hypogammaglobulinemia, *30* (Abst.)

B

Bacteria, phagocytosis, by eosinophils in infectious-related asthma (Cohen and Sapp), 113
BCG vaccine, development of tuberculous allergy after inoculation with, in offspring of female guinea pigs inoculated with, *22* (Abst.)
Betamethasone-17-valerate, intranasal, effect on allergic rhinitis and adrenal function (Brostoff and Czarny), 77
Betaprone, beta-propiolactone, effects on reaginic (skin-sensitizing) antibodies (Perlman and Malley), 10
Beta-propiolactone (Betaprone), effects on reaginic (skin-sensitizing) antibodies (Perlman and Malley), 10
Binding antibodies, blocking and, to intrinsic factor and parietal cell antibody in pernicious anemia, *29* (Abst.)
Blocking and binding antibodies to intrinsic factor and parietal cell antibody in pernicious anemia, *29* (Abst.)

Blood flow, skin, in atopic dermatitis, *26* (Abst.)
-gas tensions, spirometry and, in bronchial asthma, effect of salbutamol on, *21* (Abst.)
transfusions, role in humans: transfer of delayed hypersensitivity, *31* (Abst.)
Bronchial asthma, allergic rhinitis, and allergy skin tests among college students (Hagy and Settipane), 323
controlled study of disodium cromoglycate in treatment (Lopez et al.), 118 (Brief communication)
effect of salbutamol on spirometry and blood-gas tensions in, *21* (Abst.)
Bronchiolar relaxation, drug-induced, in guinea pig, studies on mechanism, (Blumenthal and Brody), 63
Bronchomotor responses, metabolic, circulatory and, of asthmatic children to epinephrine infusion (Lecks et al.), 261
Bronchospasm of asthma, heparin as treatment for, *34* (Abst.)

C

Cancer, arsenic and (Frost), 320 (Correspondence)
asthma, arsenic and (Novey and Martel), 315 (Brief communication)
Cataracts, posterior subcapsular, related to long-term corticosteroid treatment in children, *5* (Abst.)
Catechol-o-methyl transferase in skin of patients with atopic dermatitis, *19* (Abst.)
Cell(s), epithelial, allogeneic colonic, inhibition of in vitro cytotoxicity of lymphocytes from patients with ulcerative colitis and granulomatous colitis for, using horse anti-human thymus serum, 7 (Abst.)
lymph-node, sensitized rat, effects of various antisera on surfaces, *23* (Abst.)
parietal, antibody, blocking and binding antibodies to intrinsic factor and, in pernicious anemia, *29* (Abst.)
reticulum-, sarcoma, development at site of antilymphocyte globulin injection in patient with renal transplant, *48* (Abst.)
synthesizing antiprotein antibodies by modified hemolytic assay, enumeration, *13* (Abst.)
Cellular hypersensitivity, development in man after primary immunization, *38* (Abst.)
in Sjögren's syndrome, *39* (Abst.)
sensitivity in experimental autoimmune nephrosis in rats, in vitro demonstration, *14* (Abst.)
Chest diseases, chronic, variation on composition of sputum in, *42* (Abst.)
Cholinergic urticaria, some clinical aspects, *18* (Abst.)
Christmas tree extracts, hypersensitivity reactions to, *43* (Abst.)
Ciliocytophthoria in nasal secretion and its relation to infection and atopic disease (Papaioanou et al.), 165
Circadian reactivity rhythm of human skin to house dust, penicillin, and histamine (Reinberg et al.), 292
Circulatory, metabolic, and bronchomotor responses of asthmatic children to epinephrine infusion (Lecks et al.), 261
Cod, major allergen, characterization (Aas and Elsayed), 333
Colitis, ulcerative, and abnormal mucosal control subjects; distribution of immunoglobulins in human rectal mucosa, *22* (Abst.)
and granulomatous colitis, inhibition of in vitro cytotoxicity of lymphocytes from patients with, for allogeneic colonic epithelial cells using horse anti-human thymus serum, 7 (Abst.)
College students, bronchial asthma, allergic rhinitis, and allergy skin tests among (Hagy and Settipane), 323
Complement (C'3), human; evidence for the liver as primary site of synthesis, *22* (Abst.)
inherited deficiency of third component, *16* (Abst.)
system, interactions with endotoxic lipopolysaccharide; generation of anaphylatoxin, *6* (Abst.)
Conceptus, semen, testis and, fertilization, embryo, and fetal survival rates in rabbits isoimmunized with, *14* (Abst.)
Contact allergens, identification by animal assay, guinea pig maximazation test, *35* (Abst.)
hypersensitivity, attempt to transfer, in man, with dialysate of peripheral leukocytes, *40* (Abst.)
Corneal homograft reaction following subconjunctival antilymphocyte serum, *31* (Abst.)
Correspondence, 59, 122, 189, 320
Cortical, adrenal, insufficiency, immunologic aspects, *36* (Abst.)
Corticosteroid(s), topical, atrophy and striae due to, *19* (Abst.)
treatment, long-term, in children, posterior subcapsular cataracts related to, *5* (Abst.)
Cromoglycate, disodium, in treatment of bronchial asthma, controlled study (Lopez et al.), 118 (Brief communication)
Cross-antigenicity among six species of dust mites and house dust antigens (Miyamoto et al.), 228
Croup, dexamethasone in; controlled study, *15* (Abst.)
Culture plate, gravity settling, Andersen sampler versus, estimation of airborne fungal flora by: isolation frequency and numbers of colonies (Sayer et al.), 214

Cushing's syndrome after intermittent dexamethasone therapy, pituitary-adrenal suppression and, *4* (Abst.)
Cycloergometer (Katz and Whipp), 122 (Correspondence)
Cytotoxicity, in vitro, of lymphocytes from patients with ulcerative colitis and granulomatous colitis for allogeneic colonic epithelial cells, inhibition, using horse anti-human thymus serum, 7 (Abst.)

D

Deficiency, inherited, of third component of human complement (C'3), *16* (Abst.)
Dermatitis, atopic, skin blood flow in, *26* (Abst.)
of patients with, catechol-o-methyl in, *19* (Abst.)
contact, in beekeepers due to propolis (bee glue), *2* (Abst.)
from contact with moths (genus Hylesia), *11* (Abst.)
Dermatophagoides farinae Hughes, 1961, dust mite, house dust and, antigenic relation between, by fractionation method (Miyamoto et al.), 282
Desensitization, rational approach to (Norman), 129 (American Academy of Allergy 25th Anniversary Series)
Dexamethasone in croup; controlled study, *15* (Abst.)
intranasal: adjunct in treatment of chemical rhinitis, *26* (Abst.)
snuff, controlled trial, in chronic perennial rhinitis, *47* (Abst.)
therapy, intermittent, pituitary-adrenal suppression and Cushing's syndrome after, *4* (Abst.)
Dialysate of peripheral leukocytes, attempt to transfer contact hypersensitivity in man with, *40* (Abst.)
Diet, chemically defined, new approach with: anergy, dysimmunoglobulinemia, and unexplained inflammation (Buckley), 355
Diffusing capacities, midplane, full-chest tomograms, sputum eosinophil content, and other parameters, comparison in patients with asthma and emphysema (Preiser et al.), 154
DiGeorge's syndrome, congenital aplasia of thymus gland, *8* (Abst.)
Digit sucking and allergic nasal itching, association of incisor protrusion with (Murray and Anderson), 239
Disease(s), atopic, infection and, ciliocytophthoria in nasal secretion and its relation to infection and atopic disease (Papaioanou et al.), 165
chronic chest, variation on composition of sputum in, *42* (Abst.)
immune deficiency, combined, (thymic alymphoplasia), anti-LW antibody production in child with, *31* (Abst.)
lung, chronic obstructive, course and prognosis; prospective study of 200 patients, *10* (Abst.)
Disodium cromoglycate in treatment of bronchial asthma, controlled study (Lopez et al.), 118 (Brief communication)
Drug(s), antihistamine, new approach to use of histamine skin tests in study, *32* (Abst.)
-induced bronchiolar relaxation in guinea pig, studies on mechanism (Blumenthal and Brody), 63
treatment, last, deaths from asthma, with special reference to, *35* (Abst.)
Dust, house, and dust mite *Dermatophagoides farinae* Hughes, 1961, antigenic relation between, by fractionation method (Miyamoto et al.), 282
mites, and insects, *26* (Abst.)
penicillin, and histamine, circadian reactivity rhythm of human skin to (Reinberg et al.), 292
mites, six species, and house dust antigens, cross-antigenicity among (Miyamoto et al.), 228
Dysimmunoglobulinemia, anergy, and unexplained inflammation: new approach with chemically defined diet (Buckley), 355

E

Edema, hereditary angioneurotic, involving small intestines, *24* (Abst.)
periodic, extensive muscle necrosis after long-term treatment with aminocaproic acid (EACA) in case of, *45* (Abst.)
Embryo, fertilization, and fetal survival rates in rabbits isoimmunized with semen, testis, and conceptus, *14* (Abst.)
Emphysema, asthma and, patients with, comparison of midplane, full-chest tomograms, diffusing capacities, sputum eosinophil content, and other parameters in (Preiser et al.), 154
Encephalomyelitis, disseminated, delayed hypersensitivity to encephalitogenic protein in, *6* (Abst.)
Eosinophilia, gastric, in rats immunized with stomach, *45* (Abst.)
Eosinophilic pneumonia, chronic, *34* (Abst.)
Eosinophil(s) content, sputum, midplane, full-chest tomograms, diffusing capacities, and other parameters, comparison in patients with asthma and emphysema (Preiser et al.), 154
human, phagocytosis by, *21* (Abst.)
phagocytosis of bacteria by, in infectious-related asthma (Cohen and Sapp), 113
Epinephrine infusion, metabolic, circulatory, and bronchomotor responses of asthmatic children to (Lecks et al.), 261
Epithelial cells, allogeneic colonic, inhibition of in vitro cytotoxicity of lymphocytes from patients with ulcerative and granulomatous colitis for, using horse anti-human thymus serum, 7 (Abst.)

Epstein-Barr (E.B.) antibodies and infectious mononucleosis, *7* (Abst.)

F

Fertilization, embryo, and fetal survival rates in rabbits isoimmunized with semen, testis, and conceptus, *14* (Abst.)
Fetal and maternal immunoglobulin levels during pregnancy, *37* (Abst.)
survival rates, fertilization, embryo and in rabbits isoimmunized with semen, testis, and conceptus, *14* (Abst.)
Flora, airborne fungal, estimation by Andersen sampler versus gravity settling culture plate: isolation frequency and numbers of colonies (Sayer et al.), 214
Fractionation method, antigenic relation between house dust and dust mite, *Dermatophagoides farinae* Hughes, 1961, by (Miyamoto et al.), 282
Fungal flora, airborne, estimation by Andersen sampler versus gravity settling culture plate: isolation frequency and numbers of colonies (Sayer et al.), 214
spores, allergenic, of Delhi, India, metropolitan area, studies (Agarwal et al.), 193; (Shivpuri and Agarwal), 204

G

Gamma-globulinopathy, multiclonal, plasmacytosis, lymphocytosis and, sulfapyridine-induced serum-sickness-like syndrome associated with, *20* (Abst.)
Gastric eosinophilia in rats immunized with stomach, *45* (Abst.)
Gastrointestinal protein allergy: immunologic considerations, *36* (Abst.)
Gland, thymus, congenital aplasia (DiGeorge's syndrome), *8* (Abst.)
Gliadin, α-, studies of reagins to, in patient with wheat hypersensitivity (Goldstein et al.), 37
Globulin, antilymphocyte, injection, development of reticulum-cell sarcoma at site of, in patient with renal transplant, *48* (Abst.)
Glue, bee, propolis, contact dermatitis in beekeepers due to, *2* (Abst.)
Grass, rye, pollen antigens, in vitro studies (Lichtenstein et al.), 307
Gravity settling culture plate, Andersen sampler versus, estimation of airborne fungal flora by: isolation frequency and numbers of colonies (Sayer et al.), 214

H

Halothane sensitization in anesthetist, recurrent hepatitis attributable to, *3* (Abst.)
Hapten-protein and protein conjugates, formation of rabbit reaginic antibodies to, *46* (Abst.)
Heiner's syndrome, *40* (Abst.)
Hemocyanin, keyhole limpet, immunologic response of atopic and normal individuals to (Salvaggio et al.), 344
Hemolytic anemia, autoimmune, in child with congenital X-linked hypogammaglobulinemia, *30* (Abst.)
assay, modified, enumeration of cells synthesizing antiprotein antibodies by, *13* (Abst.)
Heparin as treatment for bronchospasm of asthma, *34* (Abst.)
Hepatitis, recurrent, attributable to halothane sensitization in anesthetist, *3* (Abst.)
Hereditary angioneurotic edema involving small intestines, *24* (Abst.)
periodic edema, extensive muscle necrosis after long-term treatment with aminocaproic acid (EACA) in case of, *45* (Abst.)
Histamine, house dust, penicillin and, circadian reactivity rhythm of human skin to (Reinberg et al.), 292
skin tests, new approach to use in study of antihistamine drugs, *32* (Abst.)
Historian's Report: American Academy of Allergy, 248
Homograft reaction, corneal, following subconjunctival antilymphocyte serum, *31* (Abst.)
Humidification in inspired air, *16* (Abst.)
Hylesia genus, moths, dermatitis from contact with, *11* (Abst.)
Hymenoptera, studies; correlation of passive transfer in Hymenoptera allergy with culprit insect and direct skin tests (Brown and Bernton), 146
Hypersensitivity, cellular, development in man after primary immunization, *38* (Abst.)
in Sjögren's syndrome, *39* (Abst.)
contact, attempt to transfer, in man, with dialysate of peripheral leukocytes, *40* (Abst.)
delayed, to encephalitogenic protein in disseminated encephalomyelitis, *6* (Abst.)
transfer: role of blood transfusions in humans, *31* (Abst.)
reactions to Christmas tree extracts, *43* (Abst.)
wheat, studies of reagins to α-gliadin in patient with (Goldstein et al.), 37
Hypogammaglobulinemia, congenital X-linked, autoimmune hemolytic anemia in child with, *30* (Abst.)
in United Kingdom, *24* (Abst.)

I

Inflammation, unexplained, anergy, dysimmunoglobulinemia and: new approach with chemically defined diet (Buckley), 355
Immune-complex formations, action of antilymphocytic sera on reactions caused by, *38* (Abst.)
deficiency disease, combined (thymic alymphoplasia), anti-LW antibody production in child with, *31* (Abst.)

Immune—Cont'd
response of bursaless birds as influenced by antibiotics and age, *4* (Abst.)
responsiveness of rats, effect of chronic alcohol administration on (Tennenbaum et al.), 272
Immunization, primary, development of cellular hypersensitivity in man after, *38* (Abst.)
Immunogenicity of pyridine-extracted, alum-precipitated ragweed (Hogan et al.), 70
Immunoglobulin(s) A, anti- (anti-IgA), anaphylactic transfusion reactions associated with, *23* (Abst.)
human, *5* (Abst.)
(IgA), selective absence; family study, *20* (Abst.)
distribution in human rectal mucosa; ulcerative colitis and abnormal mucosal control subjects, *22* (Abst.)
in human small intestinal fluid, *37* (Abst.)
levels, fetal and maternal, during pregnancy, *37* (Abst.)
serum, in acute and chronic urticaria (Mines et al.), 20
in severely burned patients, changes in, *16* (Abst.)
Immunologic aspects of adrenal cortical insufficiency, *36* (Abst.)
basis of clinical improvement, investigation; immunotherapy of pollinosis in children, *18* (Abst.)
considerations: gastrointestinal protein allergy, *36* (Abst.)
response of atopic and normal individuals to keyhole limpet hemocyanin (Salvaggio et al.), 344
Immunotherapy with antigen E (Reisman et al.), 82
of pollinosis in children; investigation of immunologic basis of clinical improvement, *18* (Abst.)
Incisor protrusion, association with digit sucking and allergic nasal itching (Murray and Anderson), 239
Infection(s) and atopic disease, ciliocytophthoria in nasal secretion and its relation to (Papaioanou et al.), 165
nonviral, and nonviral inducers; interferon, *12* (Abst.)
staphylococcic, lethal, in mice, induction of prolonged resistance against, with single injection of emulsified lipopolysaccharide (Prigal), 176
Infectious mononucleosis, acute urticaria in, *27* (Abst.)
Epstein-Barr antibodies and, *7* (Abst.)
Insect(s), culprit, and direct skin tests, correlation of passive transfer in Hymenoptera allergy with; studies on Hymenoptera (Brown and Bernton), 146
house dust, mites, and, *26* (Abst.)
Inspired air, humidification in, *16* (Abst.)
Interferon; nonviral infections and nonviral inducers, *12* (Abst.)
Intestinal, small, fluid, human, immunoglobulins in, *37* (Abst.)
Intestines, small, hereditary angioneurotic edema involving, *24* (Abst.)
Intrinsic factor and parietal cell antibody, blocking and binding antibodies to, in pernicious anemia, *29* (Abst.)
Isoproterenol aerosol therapy (Van Metre), 321 (Correspondence)
Itching, allergic nasal, digit sucking and, association of incisor protrusion with (Murray and Anderson), 239

J

Jiminez-Diaz, Carlos, 128 (Obit.)

K

Keyhole limpet hemocyanin, immunologic response of atopic and normal individuals to (Salvaggio et al.), 344

L

Leukocytes, peripheral, dialysate of, attempt to transfer contact hypersensitivity in man with, *40* (Abst.)
Limpet hemocyanin, keyhole, immunologic response of atopic and normal individuals to (Salvaggio et al.), 344
Lipopolysaccharide, emulsified, single injection, induction of prolonged resistance against lethal staphylococcic infection in mice with (Prigal), 176
endotoxic, interactions of complement system with; generation of anaphylatoxin, *6* (Abst.)
Liver, primary site of synthesis, evidence for; human C'3, *22* (Abst.)
Lung disease, chronic obstructive, course and prognosis; prospective study of 200 patients, *10* (Abst.)
Lymph-node cells, sensitized rat, effects of various antisera on surfaces, *23* (Abst.)
Lymphocytes from patients with ulcerative colitis and granulomatous colitis for allogeneic colonic epithelial cells, inhibition of in vitro cytotoxicity, using horse anti-human thymus serum, *7* (Abst.)
Lymphocytosis, plasmacytosis, and multiclonal gamma-globulinopathy, sulfapyridine-induced serum-sickness-like syndrome associated with, *20* (Abst.)

M

Maternal, fetal and, immunolglobulin levels during pregnancy, *37* (Abst.)
Maximazation test, guinea pig, identification of contact allergens by animal assay, *35* (Abst.)
Measles vaccine, depression of poison ivy skin tests by, *2* (Abst.)
-virus vaccine, inactivated and attenuated, antibody responses in serum and nasal secretions of children immunized with, *46* (Abst.)
Melioidosis, pulmonary, urticaria secondary to: report of case, *43* (Abst.)

Mercaptopurine, 6-, effect on spontaneous canine asthma (Arkins et al.), 108
Metabolic, circulatory, and bronchomotor responses of asthmatic children to epinephrine infusion (Lecks et al.), 261
Methicillin, penicillin and, renal failure and interstitial nephritis due to, *12* (Abst.)
Milk, penicillin present in, allergic reaction to, *32* (Abst.)
Mite(s), dust, *Dermatophagoides farinae* Hughes 1961, house dust and, antigenic relation between, by fractionation method (Miyamoto et al.), 282
six species, and house dust antigens, cross-antigenicity among (Miyamoto et al.), 228
house dust, and insects, *26* (Abst.)
Mononucleosis, infectious, acute urticaria in, *27* (Abst.)
Epstein-Barr (E.B.) antibodies and, *7* (Abst.)
Moth(s) (genus Hylesia), dermatitis from contact with, *11* (Abst.)
flies (Psychoda), asthma due to inhalation (Phanichyakarn et al.), 51 (Brief communication)
Mucosa, rectal, human, distribution of immunoglobulins in; ulcerative colitis and abnormal mucosal control subjects, *22* (Abst.)
Muscle necrosis, extensive, after long-term treatment with aminocaproic acid (EACA) in case of hereditary periodic edema, *45* (Abst.)

N

Nasal itching, allergic, digit sucking and, association of incisor protrusion with (Murray and Anderson), 239
secretion, ciliocytophthoria in, and its relation to infection and atopic disease (Papaioanou et al.), 165
and serum secretions of children immunized with inactivated and attenuated measles-virus vaccine, antibody responses in, *46* (Abst.)
Necrosis, muscle, extensive, after long-term treatment with aminocaproic acid (EACA) in case of hereditary periodic edema, *45* (Abst.)
Nephritis, interstitial, renal failure and, due to penicillin and methicillin, *12* (Abst.)
Nephrosis, autoimmune, experimental, in rats, in vitro demonstration of cellular sensitivity in, *14* (Abst.)
Nitrofurantoin, pulmonary reaction to, *28* (Abst.)

O

Obituaries
Alexander, H. L., 60
Jiminez-Diaz, Carlos, 128
Obstructive lung disease, chronic, course and prognosis; prospective study of 200 patients, *10* (Abst.)
Oxygen toxicity, pulmonary, in adult, *44* (Abst.)

P

Pamoate, pyrvinium, allergic reaction to, *20* (Abst.)
Para-aminosalicylic acid in human serum, demonstration of antibodies to, *3* (Abst.)
Parietal cell antibody, blocking and binding antibodies to intrinsic factor and, in pernicious anemia, *29* (Abst.)
Passive transfer in Hymenoptera allergy with culprit insect and direct skin tests; studies on Hymenoptera (Brown and Bernton), 146
Patch testing, sensitization induced by, *10* (Abst.)
Pediatric population, prospective study of allergy in, *44* (Abst.)
Penicillin, house dust, and histamine, circadian reactivity rhythm of human skin to (Reinberg et al.), 292
and methicillin, renal failure and interstitial nephritis due to, *12* (Abst.)
present in milk, allergic reaction to, *32* (Abst.)
Pernicious anemia, intrinsic factor and parietal cell antibody in, blocking and binding antibodies to, *29* (Abst.)
Phagocytosis of bacteria by eosinophils in infectious-related asthma (Cohen and Sapp), 113
by human eosinophils, *21* (Abst.)
Pharmacology and logic (Falliers), 59 (Correspondence)
Pituitary-adrenal suppression and Cushing's syndrome after intermittent dexamethasone therapy, *4* (Abst.)
Plasma, passive transfer with, of delayed allergy in guinea pigs, *39* (Abst.)
Plasmacytosis, lymphocytosis, and multiclonal gamma-globulinopathy, sulfapyridine-induced serum-sickness-like syndrome associated with, *20* (Abst.)
Pneumonia, chronic eosinophilic, *34* (Abst.)
Poison ivy skin tests by measles vaccine, depression, *2* (Abst.)
Pollen, Rumex, as aeroallergen, appraisal (Solomon), 25
rye grass, antigens, in vitro studies (Lichtenstein et al.), 307
Pollinosis in children, immunotherapy; investigation of immunologic basis of clinical improvement, *18* (Abst.)
Prednisone, effect on thyroxine distribution, *28* (Abst.)
on vitamin D metabolism in man, *13* (Abst.)
Pregnancy, fetal and maternal immunoglobulin levels during, *37* (Abst.)
Propiolactone, beta-, (Betaprone), effects on reaginic (skin-sensitizing) antibodies (Perlman and Malley), 10

Propolis (bee glue), contact dermatitis in beekeepers due to, *2* (Abst.)
Protein allergy, gastrointestinal: immunologic considerations, *36* (Abst.)
encephalitogenic, in disseminated encephalomyelitis, delayed hypersensitivity to, *6* (Abst.)
and hapten-protein conjugates, formation of rabbit reaginic antibodies to, *46* (Abst.)
Psychoda, moth flies, asthma due to inhalation (Phanichyakarn et al.), 51 (Brief communication)
Pulmonary melioidosis, urticaria secondary to: report of case, *43* (Abst.)
oxygen toxicity in adult, *44* (Abst.)
reaction to nitrofurantoin, *28* (Abst.)
Pyridine-extracted, alum-precipitated ragweed, immunogenicity (Hogan et al.), 70
Pyrvinium pamoate, allergic reaction to, *21* (Abst.)

R

Ragweed antibodies induced in nonatopic dogs, characterization, *29* (Abst.)
pyridine-extracted, alum-precipitated, immunogenicity (Hogan et al.), 70
Reaction(s), allergic, to penicillin present in milk, *32* (Abst.)
to pyrvinium pamoate, *20* (Abst.)
anaphylactic transfusion, associated with anti-IgA antibody, *23* (Abst.)
caused by immune-complex formations, action of antilymphocytic sera on, *38* (Abst.)
corneal homograft, following subconjunctival antilymphocyte serum, *31* (Abst.)
hypersensitivity, to Christmas tree extracts, *43* (Abst.)
pulmonary, to nitrofurantoin, *28* (Abst.)
systemic allergic, to ingested antigens (Golbert et al.), 96
Reactivity rhythm, circadian, of human skin to house dust, penicillin, and histamine (Reinberg et al.), 292
Reaginic antibodies, rabbit, to protein and hapten-protein conjugates, formation, *46* (Abst.)
(skin-sensitizing) antibodies, effects of beta-propiolactone (Betaprone) on (Perlman and Malley), 10
Reagins to α-gliadin, studies in patient with wheat hypersensitivity (Goldstein et al.), 37
Rectal mucosa, human, distribution of immunoglobulins in; ulcerative colitis and abnormal mucosal control subjects, *22* (Abst.)
Renal failure and interstitial nephritis due to penicillin and methicillin, *12* (Abst.)
transplant, development of reticulum-cell sarcoma at site of antilymphocyte globulin injection in patient with, *48* (Abst.)
Reproductive tract, female, inactivation of sperm antigens by sera and tissues, *5* (Abst.)
Response(s), antibody, in serum and nasal secretions of children immunized with inactivated and attenuated measles-virus vaccine, *46* (Abst.)
immune, of bursaless birds as influenced by antibiotics and age, *3* (Abst.)
immunologic, of atopic and normal individuals to keyhole limpet hemocyanin (Salvaggio et al.), 344
metabolic, circulatory, and bronchomotor, of asthmatic children to epinephrine infusion (Lecks et al.), 261
Responsiveness, immune, of rats, effect of chronic alcohol administration on (Tennenbaum et al.), 272
Reticulum-cell sarcoma, development at site of antilymphocyte globulin injection in patient with renal transplant, *48* (Abst.)
Rhinitis, allergic, and adrenal function, effect of intranasal betamethasone-17-valerate on (Brostoff and Czarny), 77
bronchial asthma, and allergy skin tests among college students (Hagy and Settipane), 323
chemical, intranasal dexamethasone, adjunct in treatment, *26* (Abst.)
chronic perennial, controlled trial of dexamethasone snuff in, *47* (Abst.)
Rubella vaccination in adult females, *47* (Abst.)
Rumex pollen as aeroallergen, appraisal (Solomon), 25
Rye grass pollen antigens, in vitro studies (Lichtenstein et al.), 307

S

Salbutamol, effect on spirometry and blood-gas tensions in bronchial asthma, *21* (Abst.)
Sampler, Andersen, estimation of airborne fungal flora by, versus gravity settling culture plate: isolation frequency and numbers of colonies (Sayer et al.), 214
Sarcoma, reticulum-cell, development at site of antilymphocyte globulin injection in patient with renal transplant, *48* (Abst.)
Semen, testis, and conceptus, fertilization, embryo, and fetal survival rates in rabbits isoimmunized with, *14* (Abst.)
Sensitivity, cellular, in experimental autoimmune nephrosis in rats, in vitro demonstration, *14* (Abst.)
Sensitization, halothane, in anesthetist, recurrent hepatitis attributable to, *3* (Abst.)
induced by patch testing, *10* (Abst.)
Serum (sera), antilymphocytic, action on reactions caused by immune-complex formations, *38* (Abst.)

Serum—Cont'd
horse anti-human thymus, inhibition of in vitro cytotoxicity of lymphocytes using, from patients with ulcerative colitis and granulomatous colitis for allogeneic colonic epithelial cells, *7* (Abst.)
human, demonstration of antibodies to, para-aminosalicylic acid in, *3* (Abst.)
immunoglobulin levels in acute and chronic urticaria (Mines et al.), 20
and nasal secretions of children immunized with inactivated and attenuated measles-virus vaccine, antibody responses in, *46* (Abst.)
-sickness-like syndrome, sulfapyridine-induced, associated with plasmacytosis, lymphocytosis, and multiclonal gamma-globulinopathy, *20* (Abst.)
and tissues of female reproductive tract, inactivation of sperm antigens by, *5* (Abst.)
and urinary uric acid in respiratory acidosis, *2* (Abst.)
Sjögren's syndrome, cellular hypersensitivity in, *39* (Abst.)
Skin blood flow in atopic dermatitis, *26* (Abst.)
human, circadian reactivity rhythm to house dust, penicillin, and histamine (Reinberg et al.), 292
of patients with atopic dermatitis, catechol-o-methyl transferase in, *19* (Abst.)
-sensitizing, reaginic, antibodies, effects of beta-propiolactone (Betaprone) on (Perlman and Malley), 10
tests, allergy, bronchial asthma, allergic rhinitis and, among college students (Hagy and Settipane), 323
direct, culprit insect and, correlation of passive transfer in Hymenoptera allergy with; studies on Hymenoptera (Brown and Bernton), 146
histamine, new approach to use in study of antihistamine drugs, *32* (Abst.)
poison ivy, by measles vaccine, depression, *2* (Abst.)
Small intestinal fluid, human, immunoglobulins in, *37* (Abst.)
Snuff, dexamethasone, controlled trial, in chronic perennial rhinitis, *47* (Abst.)
Spaceship earth (Dubos), 1 (American Academy of Allergy 25th Anniversary Series)
Sperm antigens, inactivation by sera and tissues of female reproductive tract, *5* (Abst.)
Spirometry and blood-gas tensions in bronchial asthma, effect of salbutamol on, *21* (Abst.)
Spores, allergenic fungal, of Delhi, India, metropolitan area, studies (Agarwal et al.), 193; (Shivpuri and Agarwal), 204
Sputum eosinophil content, midplane, full-chest tomograms, diffusing capacities, and other parameters, comparison in patients with asthma and emphysema (Preiser et al.), 154
variation on composition in chronic chest diseases, *42* (Abst.)
Staphylococcic infection, lethal, in mice, induction of prolonged resistance against, with single injection of emulsified lipopolysaccharide (Prigal), 176
Status asthmaticus, severe, prolonged artificial ventilation in, *42* (Abst.)
Stomach, gastric eosinophilia in rats immunized with, *45* (Abst.)
Striae, atrophy and, cutaneous, due to topical corticosteroids, *19* (Abst.)
Subconjunctival antilymphocyte serum, corneal homograft reaction following, *31* (Abst.)
Sulfapyridine-induced serum-sickness-like syndrome associated with plasmacytosis, lymphocytosis, and multiclonal gamma-globulinopathy, *20* (Abst.)
Syndrome, Cushing's, after intermittent dexamethasone therapy, pituitary-adrenal suppression and, *4* (Abst.)
DiGeorge's, congenital aplasia of thymus gland, *8* (Abst.)
Heiner's, *40* (Abst.)
Sjögren's, cellular hypersensitivity in, *39* (Abst.)

T

Testing, patch, sensitization induced by, *10* (Abst.)
Testis, semen, and conceptus, fertilization, embryo, and fetal survival rates in rabbits isoimmunized with, *14* (Abst.)
Test(s), culprit insect and direct skin, correlation of passive transfer in Hymenoptera allergy with; studies on Hymenoptera (Brown and Bernton), 146
maximazation, guinea pig, identification of contact allergens by animal assay, *35* (Abst.)
skin, allergy, bronchial asthma, allergic rhinitis and, among college students (Hagy and Settipane), 323
poison ivy, depression by measles vaccine, *2* (Abst.)
Thymic alymphoplasia, combined immune deficiency disease, anti-LW antibody production in child with, *31* (Abst.)
Thymus gland, congenital aplasia, (DiGeorge's syndrome), *8* (Abst.)
serum, horse anti-human, inhibition of in vitro cytotoxicity of lymphocytes using, from patients with ulcerative colitis and granulomatous colitis for allogeneic colonic epithelial cells, *7* (Abst.)
Thyroxine distribution, effect of prednisone on, *28* (Abst.)

Tissues, sera and, of female reproductive tract, inactivation of sperm antigens by, *5* (Abst.)
Tomograms, midplane, full-chest, diffusing capacities, sputum eosinophil content, and other parameters, comparison in patients with asthma and emphysema (Preiser et al.), 154
Toxicity, antihistamine, in children, *28* (Abst.)
pulmonary oxygen, in adult, *44* (Abst.)
Transfer, passive, with plasma, of delayed allergy in guinea pigs, *39* (Abst.)
Transfusion(s), blood, role in humans: transfer of delayed hypersensitivity, *31* (Abst.)
reactions, anaphylactic, associated with anti-IgA antibody, *23* (Abst.)
Transplant, renal, development of reticulum-cell sarcoma at site of antilymphocyte globulin injection in patients with, *48* (Abst.)
Tuberculous allergy, development after inoculation with BCG vaccine in offspring of female guinea pigs inoculated with BCG vaccine, *22* (Abst.)

U

Ulcerative colitis and abnormal mucosal control subjects; distribution of immunoglobulins in human rectal mucosa, *22* (Abst.)
and granulomatous colitis, inhibition of in vitro cytotoxicity of lymphocytes from patients with, for allogeneic colonic epithelial cells using horse anti-human thymus serum, *7* (Abst.)
Uric acid, serum and urinary, in respiratory acidosis, *2* (Abst.)
Urinary, serum and, uric acid in respiratory acidosis, *2* (Abst.)
Urticaria, acute and chronic, serum immunoglobulin levels in (Mines et al.), 20
in infectious mononucleosis, *27* (Abst.)
cholinergic, some clinical aspects, *18* (Abst.)
delayed-pressure, *27* (Abst.)
secondary to pulmonary melioidosis: report of case, *43* (Abst.)

V

Vaccination, rubella, in adult females, *47* (Abst.)
Vaccine, BCG, development of tuberculous allergy after inoculation with, in offspring of female guinea pigs inoculated with, *22* (Abst.)
measles-virus, inactivated, and attenuated, antibody responses in serum and nasal secretions of children immunized with, *46* (Abst.)
depression of poison ivy skin tests by, *2* (Abst.)
Ventilation, prolonged artificial, in severe status asthmaticus, *42* (Abst.)
Virus, measles-, vaccine, inactivated and attenuated, antibody responses in serum and nasal secretions of children immunized with, *46* (Abst.)
Vitamin D metabolism in man, effects of prednisone on, *13* (Abst.)

W

Wheat hypersensitivity, studies of reagins to α-gliadin in patient with (Goldstein et al.), 37
